

technical information. These schedules are required when applying for Auctioned Services, Partitioning and Disaggregation, Undefined Geographical Area Partitioning, and Notification of Consummation or Request for Extension of Time for Consummation. Applicants/licenses in the Public Mobile Services, Personal Communications Services, Private Land Mobile Radio Services, Broadband Radio Service, Educational Broadband Service, Maritime Services (excluding Ship), and Aviation Services (excluding Aircraft) use FCC Form 603 to apply for an assignment or transfer, to establish their parties' basic eligibility and qualifications, to classify the filing, and/or to determine the nature of the proposed service. This form is also used to notify the FCC of consummated assignments and transfers of wireless licenses to which the Commission has previously consented or for which notification but not prior consent is required. Respondents are encouraged to submit FCC 603 electronically.

The data collected on FCC 603 include the FCC Registration Number (FRN), which serves as a "common link" for all filings an entity has with the FCC. The Debt Collection Improvement Act of 1996 required that those filing with the Commission to use an FRN, effective December 3, 2001.

Records may include information about individuals or households, *e.g.*, personally identifiable information or PII, and the use(s) and disclosure of this information are governed by the requirements of a system of records notice or 'SORN', FCC/WTB-1, "Wireless Services Licensing Records." There are no additional impacts under the Privacy Act.

On August 3, 2017, the Commission released the *WRS Reform Second Report and Order* in which it consolidated the hodgepodge of service-specific geographic partitioning and spectrum disaggregation rules into a consolidated Part 1 rule, 1.950 (*See Amendment of Parts 1, 22, 24, 27, 74, 80, 90, 95, and 101 To Establish Uniform License*

Renewal, Discontinuance of Operation, and Geographic Partitioning and Spectrum Disaggregation Rules and Policies for Certain Wireless Radio Services, Second Report and Order and Further Notice of Proposed Rulemaking, FCC 17–105, (*WRS Reform Second Report and Order*). Of relevance to the information collection at issue here, the Commission required that when portions of geographic licenses are sold, both parties to the transaction have a clear construction obligation and penalty in the event of failure.

Specifically, § 1.950(c) requires parties seeking approval for geographic partitioning, spectrum disaggregation, or a combination of both must apply for a partial assignment of authorization by filing FCC Form 603 pursuant to § 1.948 of the Commission's rules. Each request for geographic partitioning must include an attachment defining the perimeter of the partitioned area by geographic coordinates to the nearest second of latitude and longitude, based upon the 1983 North American Datum (NAD83). Alternatively, applicants may specify an FCC-recognized service area (*e.g.*, Basic Trading Area, Economic Area, Major Trading Area, Metropolitan Service Area, or Rural Service Area), county, or county equivalent, in which case, applicants need only list the specific FCC-recognized service area, county, or county equivalent names comprising the partitioned area. Additionally, applicants have the option to submit geographic data associated with applications to partition and/or disaggregate their license using a shapefile, KML or Geojson file format.

In addition, § 1.950(d) requires applicants for geographic partitioning, spectrum disaggregation, or a combination of both, to include, if applicable, a certification with their partial assignment of authorization application stating which party will meet any incumbent relocation requirements, except as otherwise stated in service-specific rules. Further, § 1.950(g) provides parties to geographic

partitioning, spectrum disaggregation, or a combination of both, with two options to satisfy service-specific performance requirements (*i.e.*, construction and operation requirements). Under the first option, each party may certify that it will individually satisfy any service-specific requirements and, upon failure, must individually face any service-specific performance penalties. Under the second option, both parties may agree to share responsibility for any service-specific requirements. Upon failure to meet their shared service-specific performance requirements, both parties will be subject to any service-specific penalties.

The Commission seeks approval for revisions to its currently approved collection of information under OMB Control Number 3060–0800 to permit the collection of the additional information in connection with partial assignments of authorizations for geographic partitioning, spectrum disaggregation, or a combination of both, pursuant to the rules and information collection requirements adopted by the Commission in the *WRS Reform Second Report and Order*. We do not anticipate that these revisions will impact the collection filing burden.
