reported in the currently-effective FERC Form No. 60. However, minor formatting changes were made to facilitate electronic filing. The minor changes include: placing the instructions at the top of each page for each schedule; updating certain schedules so that the data and information is reported in a structured format on the schedule; renumbering certain pages; and updating the General Instructions to clarify that the respondents will be required to use the form submission software to file the form.

Filers of the FERC Form No. 60 will need an identification number to access the form submission software. To obtain an identification number, please e-mail FERC Online Support at ferconlinesupport@ferc.gov and include your name, company name, company address, and phone number. If you will file for more than one company, please include the names of all companies in the e-mail. You will receive an identification number for each company by return e-mail. The identification number is critical for the electronic filing of the FERC Form No. 60. For security reasons, identification numbers will not be given out over the phone. Submittals made using any other format or media will not be compliant with Order No. 685.

The Commission will conduct beta testing on the FERC Form No. 60 submission software in early January 2007. FERC Form No. 60 filers wishing to participate in beta testing should e-mail form60_registration@ferc.gov by December 29, 2006, and provide contact information including company name, company address, phone number, and contact person's e-mail address.
