

The federal Forest Service is the lead agency for preparing this EIS. They will consult with the United States Fish and Wildlife Service when making this decision. The responsible official who will make the decision regarding snowmobile use in Management Area 11 lands is Deborah L. R. Austin, Forest Supervisor, Lolo National Forest, Building 24, Fort Missoula, Missoula MT 59804. She will decide on this proposal after considering comments, responses, environmental consequences, applicable laws, regulations, and policies. The decision and rationale for the decision will be documented in a Record of Decision.

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review in September 2000. At that time, the EPA will publish a Notice of Availability of the Draft EIS in the **Federal Register**. The comment period on the Draft EIS will be 45 days from the date of the EPA's notice of availability in the **Federal Register**. The final EIS is scheduled to be completed by October 2000. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency published the Notice of Availability in the **Federal Register**.

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental

impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.).

Dated: February 17, 2000.

Deborah L.R. Austin,

Forest Supervisor, Lolo National Forest.
