

consistent national implementation. The LCRMR do not affect the lead or copper rule maximum contaminant level goals, action levels, or the basic regulatory requirements.

Monitoring, reporting and record keeping are required at both the system and State levels under the National Primary Drinking Water Regulations (NPDWRs). EPA has chosen to require the least frequent collection that remains consistent with overall public health preservation objectives. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**Burden Statement:** The estimated annual burden hours for the LCR amendment to the Disinfectants/Disinfection Byproducts, Chemical, and Radionuclides Rules ICR are 2,431,728 hours. The estimated average burden hours per response is 0.3 hours. The estimated average number of responses per respondent is 2.1. The estimated number of likely respondents annually is 76,001. The estimated annual cost is \$14 million which represents O&M costs only. The estimated annual burden hours and costs for the LCR amendment will be additive to the current OMB inventory for the The Disinfectants/Disinfection Byproducts, Chemical, and Radionuclides Rules ICR. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and

systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
