47 CFR 76.1700(d) exempts cable television systems having fewer than 1,000 subscribers from the online public file and the public inspection requirements contained in 47 CFR

Public files must be available for public inspection during regular business hours.

pursuant to that rule by inclusion of the written policy in the operator's public inspection file.

Estimated Time per Response: 25-40 hours.

Total Annual Burden: 5,290 hours.

Needs and Uses: The Commission established a safety valve to ensure that carriers experiencing rapid growth in a given market will be able to meet customer demand. States may use this safety valve to grant requests from carriers that demonstrate the following:

(1) The carrier will exhaust its numbering resources in a market or rate area within three months (in lieu of six months-to-exhaust requirement); and

(2) Projected growth is based on the carrier's actual growth in the market or rate area, or in the carrier's actual growth in a reasonably comparable market, but only if that projected growth varies no more than 15 percent from historical growth in the relevant market.

The Commission lifted the ban on service-specific and technology-specific overlays (collectively, specialized overlays or SOs), allowing state commissions seeking to implement SOs to request delegated authority to do so on a case-by-case basis. To provide further guidance to state commissions,
