

coatings and coating components. Responses to the collection are mandatory under 40 CFR part 59, subpart B—National Volatile Organic Compound Emission Standards for Automobile Refinish Coatings.

The information collection includes initial and periodic reporting necessary for the EPA to ensure compliance with the promulgated federal rule for automobile refinish coatings. The rule will be enforced through random sampling of coatings to determine VOC content. All manufacturers and importers of coatings and coating components subject to this rule must submit an initial report. The initial report must include the name and mailing address of the manufacturer or importer. The rule requires that containers of all subject automobile refinish coatings and coating components display the date of manufacture or a code indicating the date of manufacture. All manufacturers and importers of subject coatings and coating components must submit an explanation of all date codes used on automobile refinish coating and coating component containers. Date code explanations can be submitted with the initial report. Thereafter, respondents must submit explanations of any new date codes within 30 days of their first use. The EPA is required under section 183(e) of the Clean Air Act (Act) to regulate VOC emissions from the use of consumer and commercial products. Pursuant to section 183(e)(3), the EPA published a list of consumer and commercial products and a schedule for their regulation (60 FR 15264). Automobile refinish coatings were included in Group 1 of the list, and the standards for such coatings were promulgated on September 11, 1998 (63 FR 48806). The reports required under the rule enable the EPA to identify all coating and coating component manufacturers and importers in the United States, and to determine which coatings and coating components are subject to the rule based on dates of manufacture. Agency enforcement personnel will use the information collected to identify manufacturers and importers subject to the rule and to determine which coatings and coating components are subject to the rule by dates of manufacture.

All information submitted to the EPA for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in 40 CFR part 2, subpart B—Confidentiality of Business Information.
