

**DEPARTMENT OF DEFENSE****GENERAL SERVICES  
ADMINISTRATION****NATIONAL AERONAUTICS AND  
SPACE ADMINISTRATION**

[OMB Control No. 9000-0067]

**Federal Acquisition Regulation;  
Information Collection; Incentive  
Contracts**

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice of request for public comments regarding an extension to an existing OMB clearance.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning incentive contracts. The clearance currently expires on December 31, 2008.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

**DATES:** Submit comments on or before February 9, 2009.

**ADDRESSES:** Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the General Services Administration, FAR Secretariat (VPR), 1800 F Street, NW., Room 4041, Washington, DC 20405.

**FOR FURTHER INFORMATION CONTACT:** Warren Blankenship, Contract Policy Division, GSA (202) 501-1900.

**SUPPLEMENTARY INFORMATION:****A. Purpose**

Incentive contracts are normally used when a firm fixed-price contract is not

appropriate and the required supplies or services can be acquired at lower costs, and sometimes with improved delivery or technical performance, by relating the amount of profit or fee payable under the contract to the contractor's performance.

The information required periodically from the contractor, such as cost of work already performed, estimated costs of further performance necessary to complete all work, total contract price for supplies or services accepted by the Government for which final prices have been established, and estimated costs allocable to supplies or services accepted by the Government and for which final prices have not been established, is needed to negotiate the final prices of incentive-related items and services.

The contracting officer evaluates the information received to determine the contractor's performance in meeting the incentive target and the appropriate price revision, if any, for the items or services.

**B. Annual Reporting Burden**

*Respondents:* 3,000.

*Responses per Respondent:* 1.

*Annual Responses:* 3,000.

*Hours per Response:* 1.

*Total Burden Hours:* 3,000.

*Obtaining Copies of Proposals:*

Requesters may obtain a copy of the information collection documents from the General Services Administration, FAR Secretariat (VPR), Room 4041, 1800 F Street, NW., Washington, DC 20405, telephone (202) 501-4755. Please cite OMB Control No. 9000-0067, Incentive Contracts, in all correspondence.

Dated: November 26, 2008.

**Rhonda Cundiff,**

*Acting Director, Office of Acquisition Policy.*

BILLING CODE 6820-EP-P

**DEPARTMENT OF ENERGY****Request for Information: Geothermal  
Workforce Education Development and  
Retention**

**AGENCY:** Office of Energy Efficiency and Renewable Energy, Department of Energy (DOE).

**ACTION:** Notice of Request for Information (DE-PS36-09GO39004).

**SUMMARY:** The Department of Energy (DOE) gives notice of a Request for Information (RFI), seeking innovative ways for industry and educators to work together in addressing important challenges in the geothermal program; under authorities such as 42 U.S.C.

Section 7381(b) of the Department of Energy Education Enhancement Act, and the Energy Policy Act of 2005, Section 931(a)(2)(C). The Federal government and industry must address the growing inadequacy of workforce competencies due to the small size of the existing geothermal industry and the competition for human resources, as the geothermal industry competes with the oil and gas industry for qualified personnel. The limited capability for meeting a critical need in qualified personnel is compounded by the current lack of formal university degree programs. This RFI seeks input regarding future GTP funding, potential initiatives within the industry and in the classroom, and with DOE administrative efforts.

**DATES:** Written comments must be received by January 30, 2009.

**ADDRESSES:** Send all responses to this RFI to [RFI-09GO39004@go.doe.gov](mailto:RFI-09GO39004@go.doe.gov) in Microsoft Word format.

**FOR FURTHER INFORMATION CONTACT:**

Questions regarding the content of the RFI must be submitted to the following e-mail address: [RFI-09GO39004@go.doe.gov](mailto:RFI-09GO39004@go.doe.gov).

**SUPPLEMENTARY INFORMATION:** The U.S. Department of Energy's Geothermal Technology Program (GTP) is working with industry and educators to address important challenges in the geothermal program under authorities such as 42 U.S.C. Section 7381(b) of the Department of Energy Education Enhancement Act, and the Energy Policy Act of 2005, Section 931(a)(2)(C). Glitnir Geothermal Research's 2008 United States Geothermal Energy Market Report asserts that human capital will be a bottleneck to advancing geothermal energy technology and could delay development of Enhanced Geothermal Systems (EGS) technology.

The limited capability for meeting this need is further illustrated by the current lack of formal university degree programs. The Federal government and industry, together, must address the growing inadequacy of workforce competencies due to the small size of the existing geothermal industry and the competition for human resources, as the geothermal industry competes with the oil and gas industry for qualified personnel.

Future GTP funding and administrative efforts may focus on the following goals:

- Institute program activities affiliated with the development and retention of the geothermal-specific competencies.
