

Nevada) with the Gonder substation (north of Ely, Nevada). The project would improve electricity import and export capabilities to meet anticipated growth in SPPC's system.

The project, as currently proposed, identifies several route alternatives. The northern portion of any route would head south from the Falcon substation to Highway 50 near Eureka along one of several possible alignments. The southern portion of any route alternative would then head east along Highway 50 to follow an existing Sierra 230 kV line to the Gonder substation. The current alternatives are identified as the Crescent Valley (a), Crescent Valley (b), Pine Valley (a), Pine Valley (b), and Buck Mountain alternatives. The No Action alternative is also analyzed. The Pine Valley (a) route is BLM's preferred alternative.

As part of the proposed action, the BLM is also considering amendments to the RMPs for the Shoshone-Eureka Resource Area, Elko Resource Area, and Egan Resource Area to establish rights-of-way utility corridors along the preferred alignment. The Elko RMP also requires modifying the existing "low visibility" corridor along Interstate 80. Amendments to the Shoshone-Eureka RMP also include the deletion of a utility planning corridor that runs parallel to State Highway 305.
