

baseline existing conditions and examines the potential growth in agency mission, laboratory and laboratory support space, office space and personnel occupying the Roybal Campus, and identifies a preferred alternative for future development. The preferred alternative was the result of an extensive screening process, which identified and evaluated a range of conceptual development alternatives based on future program needs, campus constraints, and specifically developed selection criteria. Selection criteria included the examination of regional and local planning policy, utility demand, air quality, commute time, transportation system capacity and greenhouse gas effects.

Alternatives Considered

HHS/CDC analyzed two alternatives in the DEIS: the Proposed Action and the No Action Alternative. The Proposed Action Alternative consists of HHS/CDC's implementation of the Master Plan preferred alternative. Improvements proposed under the Master Plan preferred alternative include new laboratory construction, existing building renovation, parking expansion, and infrastructure upgrades. Under the Master Plan preferred alternative, the new laboratory building would contain approximately 350,000 to 450,000 gross square feet and would be constructed on an existing surface parking lot located in the eastern portion of the Roybal Campus. In addition to a new laboratory, a new approximately 1,600 space parking deck would be constructed just south of the new laboratory building. Construction of the new parking deck, along with the new laboratory and supporting infrastructure would eliminate an existing surface parking and result in a net increase of approximately 1,200 parking spaces at the Roybal Campus. HHS/CDC anticipates that the construction of the new parking deck would increase the campus parking cap from 3,300 to approximately 4,500 spaces. The employee population at the Roybal Campus is projected to increase by approximately 1,485 new occupants under the Master Plan preferred alternative in 2025.

The No Action Alternative represents continued operation of the existing facilities at the Roybal Campus without any new construction or building additions over the ten-year planning period from 2015 to 2025. However, the employee population at the Roybal Campus is projected to increase by approximately 865 new occupants under the No Action Alternative due to

potential background growth of existing Campus programs.

The DEIS evaluates the environmental impacts that may result from the Proposed Action and the No Action Alternative on the natural and built environment. Potential direct, indirect and cumulative impacts of each alternative are evaluated on the following resource categories: socioeconomics, land use, zoning, public policy, community facilities, transportation, air quality, noise, cultural resources, urban design and visual resources, natural resources, utilities, waste, and greenhouse gases and sustainability. The DEIS identifies measures to mitigate potential adverse impacts.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of

information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

This is known as the Healthcare Fraud Prevention Partnership (HFPP). It was officially established by a Charter in fall 2012 and signed by HHS Secretary Sibelius and US Attorney General Holder. The HFPP is a joint initiative established by the Department of Health and Human Services (HHS) and Department of Justice (DOJ) to detect and prevent the prevalence of healthcare fraud through data and information-sharing and applying analytic capabilities by the public and private sectors. The HFPP collaboration provides a unique opportunity to transition from traditional "pay and chase" approaches for fraud detection and recovery towards a data-driven model for identifying and predicting aberrant activity. A central goal of the HFPP is to identify the optimal way to coordinate nationwide sharing of health care claims information, including aggregating claims and payment information from large public healthcare programs and private insurance payers. In addition to sharing data and information, the HFPP is focused on advancing analytics, training, outreach, education to support anti-fraud efforts and achieving its objectives, primarily through goal-oriented, well-designed fraud studies. *Form Number:* CMS-10501 (OCN: 0938-New); *Frequency:*

Occasionally; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 75; *Total Annual Responses:* 75; *Total Annual Hours:* 180,000. (For policy questions regarding this collection contact Johnalyn Lyles at 410-786-8410.)
