Federal Energy Regulatory Commission

[Docket No. ER03-563-000]

Devon Power LLC, et al.; Order Accepting, in Part, Requests for Reliability Must-Run Contracts and Directing Temporary Bidding Rules

Issued April 25, 2003.

Before Commissioners: Pat Wood, III, Chairman; William L. Massey and Nora Mead Brownell.

1. In this order, we will deny the requests filed by Devon Power LLC, Middletown Power LLC, Montville Power LLC, Norwalk Power LLC (collectively Applicants) and NRG Power Marketing Inc. (NRG) for Reliability Must-Run (RMR) contracts that recover the full cost-of-service, and instead permit these RMR agreements to recover only certain going-forward maintenance costs. In addition, we direct ISO New England, Inc. (ISO-NE) to establish temporary bidding rules that permit selected RMR peaking units to raise their bids so as to recover their fixed and variable cost-of-service through the market, and change, as necessary, the market rules to allow these bids (when accepted) to set the energy price. These temporary rules are to remain in effect until ISO-NE makes a filing and places into effect certain changes to the market prior to the 2004 summer peak season as identified below. This action will benefit the New England market by establishing locational prices that more accurately reflect the value of additional supply, transmission, and/or demand response resources into the marketplace.

Background

2. On September 20, 2002, the Commission issued an order accepting a new Standard Market Design for New England (NE-SMD) which replaces New England Power Pool's (NEPOOL) former market rules with a new Market Rule 1.¹ Appendix A to Market Rule 1 includes an approach for monitoring and mitigating market power.² The Commission stated that this approach identifies resources potentially exercising market power by comparing their current energy supply offers with a proxy for what the resources would bid if they had no market power. The Commission added that when a supply offer significantly exceeds the proxy
