

than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Most TRU waste consists of items contaminated during the production of nuclear weapons, such as rags, equipment, tools, and organic and inorganic sludges.

On May 13, 1998, EPA announced its final compliance certification decision to the Secretary of Energy (published May 18, 1998, 63 FR 27354). This decision states that the WIPP will comply with the EPA's radioactive waste disposal regulations at 40 CFR part 191, subparts B and C.

The final WIPP certification decision includes a condition that prohibits shipment of TRU waste for disposal at WIPP from any site other than LANL until EPA has approved the procedures developed to comply with the waste characterization requirements of § 194.24(c)(4) (Condition 3 of Appendix A to 40 CFR part 194). The EPA's approval process for waste generator sites is described in § 194.8. As part of EPA's decision making process, DOE is required to submit to EPA relevant documentation of waste characterization programs at each DOE waste generator site seeking approval for shipment of TRU radioactive waste to the WIPP. In accordance with § 194.8, EPA will place such documentation in the official Air Docket in Washington, D.C., and in informational dockets in the State of New Mexico, for public review and comment.

At the direction of DOE's Carlsbad Field Office (CBFO), Westinghouse TRU Solutions (WTS) has been developing the CCP mainly to assist DOE facilities that have generated small quantities of TRU waste with meeting applicable waste characterization requirements. At the present stage of development of the CCP, all required waste characterization will be managed by WTS at TRU waste sites prior to shipment to the WIPP. For the inspection announced today, the CCP will demonstrate their capabilities in characterizing TRU debris waste generated at SRS in accordance with the DOE/CBFO-implemented waste characterization (WC) and quality assurance (QA) plans.

DOE/CBFO conducted an initial audit of the CCP at SRS on June 18–20, 2001, which EPA observed. DOE/CBFO has scheduled a final audit for the week of September 24, 2001, to evaluate the adequacy, implementation, and effectiveness of technical and quality assurance activities related to the CCP TRU waste characterization of contact-handled, retrievably-stored debris waste at SRS. The evaluation would lead DOE/CBFO to certify that the CCP-characterized CH TRU debris waste

meets all applicable requirements at 40 CFR part 194. We will conduct an independent inspection under § 194.8 at the same time as DOE/CBFO's audit to verify that the CCP has characterized SRS-generated CH TRU debris waste appropriately in accordance with Condition 3 of our WIPP Certification Decision (Appendix A to 40 CFR part 194) and § 194.24(c)(4). The CCP may not ship transuranic waste from SRS to the WIPP until EPA has approved the CCP's waste characterization processes and quality assurance in accordance with § 194.8.

The following documents related to the CCP have been placed in Air Docket A–98–49, particularly: (1) “CCP–PO–001—Revision 2, 7/23/01—CCP Transuranic Waste Quality Assurance Characterization Project Plan” (2) “CCP–PO–002—Revision 2, 7/23/01—CCP Transuranic Waste Certification Plan” and (3) IWR NO. AC27750W—Revision 0, 7/23/01—Savannah River Site Statement of Work IE 8863 for Clarification of SRS TRU Waste.” These documents describe the top-tier programmatic requirements for the CCP. In accordance with § 194.8 of the WIPP compliance criteria, we are providing the public 30 days to comment on the documents in the docket. EPA will review other potentially relevant documentation and will interview CCP personnel during the inspection. Our inspection activities and findings will be summarized in our inspection report, which will be placed in Docket A–98–49.

If EPA determines that the provisions in the documents available in the EPA Docket are adequately implemented, we will notify DOE by letter and place the letter in the official Air Docket in Washington, D.C., and in the informational docket locations in New Mexico. We will not make a determination of compliance prior to the inspection or before the 30-day comment period has closed.

Information on EPA's radioactive waste disposal standards (40 CFR part 191), the compliance criteria (40 CFR part 194), and EPA's certification decision is filed in the official EPA Air Docket, Dockets No. R–89–01, A–92–56, and A–93–02, respectively, and is available for review in Washington, D.C., and at the three EPA WIPP informational docket locations in New Mexico. The dockets in New Mexico contain only major items from the official Air Docket in Washington, D.C., plus those documents added to the official Air Docket after the October 1992 enactment of the WIPP LWA.

Dated: August 23, 2001.

Jeffrey R. Holmstead,

Assistant Administrator for Air and Radiation.

FEDERAL RESERVE SYSTEM

Government in the Sunshine Meeting Notice

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 11:00 a.m., Tuesday, September 4, 2001.

PLACE: Marriner S. Eccles Federal Reserve Board Building, 20th and C Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Michelle A. Smith, Assistant to the Board; 202–452–3204.

SUPPLEMENTARY INFORMATION: You may call 202–452–3206 beginning at approximately 5 p.m. two business days before the meeting for a recorded announcement of bank and bank holding company applications scheduled for the meeting; or you may contact the Board's Web site at <http://www.federalreserve.gov> for an electronic announcement that not only lists applications, but also indicates procedural and other information about the meeting.

Dated: August 24, 2001.

Robert deV. Frierson,

Deputy Secretary of the Board.
