SUPPLEMENTARY INFORMATION:

I. Background

To reduce the risk of illness and death from consumption of eggs contaminated with *Salmonella enteritidis* (SE), FDA published in the **Federal Register** of July 6, 1999 (64 FR 36492), a proposed rule requiring the labeling of shell eggs with a safe handling statement and the refrigeration of shell eggs at retail. FDA published the final rule in the **Federal Register** of December 5, 2000 (65 FR 76092).

FDA examined the economic implications of that final rule as required by the Regulatory Flexibility Act (5 U.S.C. 601-602) and determined that the final rule would have a significant economic impact on a substantial number of small entities.

In compliance with section 212 of the Small Business Regulatory Fairness Act (Public Law 104-121), FDA made available (via the Internet) a SECG stating in plain language the requirements of this regulation.

FDA is issuing this SECG as level 2 guidance consistent with FDAs good guidance practices regulation (21 CFR 10.115(c)(2)). The SECG represents the agency's current thinking on the subject.

It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
