

disposal, including the option for beneficial re-use of dredged material, will be evaluated for each dredging project. The proposed ODMDS will be monitored periodically to ensure that the site operates as expected. This proposed site designation has been prepared pursuant to Section 102 of the Marine Protection, Research and Sanctuaries Act (MPRSA). The evaluation is based on EPA's general and specific criteria. Field studies, modeling of sediment dispersion following dredged material disposal under various scenarios, constrained areas, and economic considerations are included in the evaluation. The draft EIS contains an evaluation of potential impacts associated with the two "Action" alternatives, and the No-Action alternative. There are two alternative locations for a permanent ODMDS; either the North or Northwest alternative. The proposed North ODMDS is approximately 13.7 nautical miles offshore of Outer Apra Harbor, and in water depths ranging from 6,560 and 7,710 feet. The proposed Northwest ODMDS is approximately 8.9 nautical miles offshore of Outer Apra Harbor, and in water depths ranging from 8,200 and 9,055 feet. There would be a maximum annual disposal limit of 1,000,000 cubic yards of dredged material for whichever site is chosen. Either location has been determined to be environmentally suitable given depth and stability; however the Northwest alternative is the preferred site. The proposed ODMDS will be managed by the USEPA and U.S. Army Corps of Engineers (USACE) Honolulu District.

Comments were received during the scoping comment period and a public scoping meeting was held at the Weston Resort Guam on December 6, 2007. Revisions were made to the field sampling and data collection program (conducted in 2008) and to the analysis presented in the draft EIS to address these comments.
