

The first *annual evaluation report* is expected at month 18 from the award start date, and then annually thereafter for the life of the award. The report is prepared and submitted to NSF by an external evaluation team required of each Engine award. The report discusses progress relative to the milestones, baselines, benchmarks, objectives, and targets as listed in the corresponding 5-year strategic and implementation plan. The evaluation reports provide an objective and independent assessment

of how each Engine is performing relative to their goals and milestones, and are not subject to approval by Engine awardees. Information gathered will be used for the dual and interrelated purposes of disseminating information about the NSF Engines program and using this information to make programmatic improvements, efficiencies, and enhanced program monitoring for NSF Engines. Feedback collected under this clearance provides useful information

for the continued evolution of the NSF Engines program. The collective reporting requirements will help TIP monitor the progress of individual Engines, identify trends over time, assess overall program performance.

Burden on the Public

For each Engine award, we anticipate the following number of responses and response burden by reporting requirement:

Reporting requirement	Number of responses (per year)	Frequency of data collection	Approximate lower bound response burden (hours)	Approximate upper bound response burden (hours)
Quarterly progress report	4	Quarterly	40	80.
Five-year strategic and implementation plan	1	Once a year	Year 1: 1,040	Year 1: 10,400.
			Year 2: 80	Year 2: 160.
			Year 3: 80	Year 3: 160.
Annual evaluation report	1	Once a year	200	1,040.

We estimated that, on average, each of the twenty components of the Five-year Strategic and Implementation Plan could take up to 520 hours to complete, hence the upper bound estimate of 10,400 hours per Engine. We also anticipate that each component of the Plan will be developed and completed by multiple and various team members within an Engine.

In addition, the upper bound estimate for the annual evaluation report reflects not only the effort for writing the report but also account for data cleaning, data analysis, and data visualization. We anticipate that the burden for subsequent years to be lower as workflow and cadence will be established after the first year.

A total of 10 Engine teams were awarded. For the first year, the total amount of burden estimated is between 1,280 and 11,520 hours per Engine. For subsequent years, 320 and 1,280 hours.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35), as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection. OPM is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology permitting electronic submissions of responses.

The Federal Wage System (FWS) is the pay system established under 5 U.S.C. 5341 *et seq.* for prevailing rate employees who work in trade, craft, and laboring occupations. The FWS establishes rates of pay for Federal prevailing rate employees through local wage surveys of private sector employers. The FWS includes 130 appropriated fund and 118

nonappropriated fund local wage areas. The Establishment Information Form, the Wage Data Collection Form, and the Wage Data Collection Continuation Form are wage survey forms developed by OPM based on recommendations of the Federal Prevailing Rate Advisory Committee for use by the Department of Defense to establish prevailing wage rates for FWS employees Governmentwide. The Establishment Information Form, the Wage Data Collection Form, and the Wage Data Collection Continuation Form are being submitted for renewal without any changes.
