Abstract: The National Agricultural Statistics Service is responsible for collecting and issuing State and national estimates of crop and livestock production, grain stocks, farm numbers, land values, on-farm pesticide usage, and pest crop management practices. The Field Crops Production program consists of probability field crops surveys and supplemental panel surveys which capture unique crop characteristics such as the concentration of crops in localized geographical areas. The Program is being revised to discontinue the November and December tobacco forecasts. NASS will no longer forecast tobacco acreage, yield, and production in the November and December Crop Production reports. All types of tobacco are affected in November, whereas only burley tobacco is affected in December. Final production estimates will continue to be published for all types of tobacco in the Annual Crop Production report, released on or about January 10 each year. Annual tobacco revisions will continue to be published in the May Crop Production report.
