2. *Project name and location:* Draw One Bridge Replacement Project (MA Project), Boston, Suffolk County, and Cambridge, Middlesex County, Massachusetts.

*Project Sponsor:* Massachusetts Bay Transportation Authority (MBTA).

*Project description:* The MA Project would involve the replacement of the Draw One Bridge, which carries Amtrak passenger and MBTA commuter rail traffic over the Charles River in the cities of Boston and Cambridge, Massachusetts. The existing two two-track bascule bridge spans would be replaced with three two-track, standalone vertical lift bridge structures within the footprint of the existing bridges. The new bridge structures would carry six tracks, rather than the four on the current crossings. The MA Project would also replace the Boston and Main Railroad (B&MRR) Signal Tower A and modify the Massachusetts Department of Conservation and Recreation-owned North Bank Bridge, which crosses the MBTA right-of-way north of the Draw One Bridge. The MA Project work would also include replacing the existing signal system and switch heaters associated with the Draw One Bridge, and installing a new drainage system.

*Final agency action:* Section 106 Memorandum of Agreement, dated December 18, 2024; Section 4(f) de minimis, dated January 8, 2025; Draw One Bridge Replacement Project Finding of No Significant Impact (FONSI), dated January 16, 2025.

*Supporting documentation:* Draw One Bridge Replacement Project, Final Environmental Assessment (Final EA), dated January 16, 2025. The FONSI, EA and supporting documents can be viewed and downloaded from: <https://www.mbta.com/projects/north-station-drawbridge-replacement>.

**SUPPLEMENTARY INFORMATION:** Title 5, Code of Federal Regulations (CFR) section 1320.8(d), requires PHMSA to provide interested members of the public and affected agencies the opportunity to comment on information collection and recordkeeping requests before they are submitted to OMB for approval. This notice identifies two information collection requests that PHMSA will submit to OMB for renewal and requests comment from interested parties.

The following information is provided for each information collection request: (1) Title of the information collection; (2) OMB control number; (3) Current expiration date; (4) Type of request; (5) Abstract of the information collection activity; (6) Description of affected public; (7) Estimate of total annual reporting and recordkeeping burden; and (8) Frequency of collection.

PHMSA will request a three-year term of approval for these information collection activities. PHMSA requests comments on the following information:

1. *Title:* “Rupture Mitigation Valve Recordkeeping Requirements”.

*OMB Control Number:* 2137-0637.

*Current Expiration Date:* 11/30/2025.

*Abstract:* Operators who have experienced a rupture or rupture-mitigation valve shut-off are required to complete a post-incident review. The post-incident summary, all investigation and analysis documents used to prepare it, and records of lessons learned must be kept for the life of the pipeline.

Operators must also develop written rupture identification procedures to evaluate and identify whether a notification of potential rupture is an actual rupture event or non-rupture event as soon as practicable. These procedures must, at a minimum, specify the sources of information, operational factors, and other criteria that operator personnel use to evaluate a notification of potential rupture. Operators are also required to maintain certain records if they experience certain circumstances involving their rupture-mitigation valve operations.

*Affected Public:* Operators of PHMSA-regulated pipelines.

*Annual Reporting and Recordkeeping Burden:*

*Total Annual Responses:* 4,213.

*Total Annual Burden Hours:* 85,724.

*Frequency of Collection:* On occasion.

2. *Title:* “Rupture Mitigation Valve Notification Requirements”.

*OMB Control Number:* 2137-0638.

*Current Expiration Date:* 11/30/2025.

*Abstract:* 49 CFR 192.634 and 49 CFR 195.418 require operators who elect to use alternative equivalent technology to notify the Office of Pipeline Safety at least 90 days in advance of use. An operator choosing this option must include a technical and safety evaluation, including design, construction, and operating procedures for the alternative equivalent technology with the notification.

Operators must notify PHMSA if a rupture-mitigation valve cannot be made operational within 14 days of installation. Operators must also notify PHMSA if a valve cannot be repaired or replaced within 12 months.

An operator may seek exemption from certain regulatory requirements by notifying PHMSA in certain instances.

An operator may plan to leave a rupture-mitigation valve open for more than 30 minutes following a rupture identification if the operator demonstrates to PHMSA, that closing a rupture mitigation valve, or alternative equivalent technology, would be detrimental to public safety. Likewise, for hazardous liquid pipeline segments in a non-high consequence area (HCA) or a non-HCA could-affect segment, an operator may request exemption from certain requirements if it can demonstrate to PHMSA that installing an otherwise-required rupture-mitigation valve, or alternative equivalent technology, would be economically, technically, or operationally infeasible.

*Affected Public:* Operators of PHMSA-regulated pipelines.

*Annual Reporting and Recordkeeping Burden:*

*Total Annual Responses:* 598.

*Total Annual Burden Hours:* 2,378.

*Frequency of Collection:* On occasion.

*Comments are invited on:*

(a) The need for the renewal and revision of these collections of information for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) The accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of the collection of information on those

who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques.

*Authority:* The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.
