SUPPLEMENTARY INFORMATION: The Secretary of Commerce and the Advisor to the President overseeing the Office of Economic Initiatives serve as the co-chairs of the Advisory Board. In addition to the co-chairs, the Advisory Board comprises 25 members that represent various sectors of the economy. The Board advises the National Council for the American Worker.

The September meeting will include updates on implementation of the Call to Action from the May 2020 meeting and recommendations from prior meetings, and discussions of new recommendations under the four main goals of the Advisory Board:

- Develop a Campaign to Promote Multiple Pathways to Career Success. Companies, workers, parents, and policymakers have traditionally assumed that a university degree is the best, or only, path to a middle-class career. Employers and job seekers should be aware of multiple career pathways and skill development opportunities outside of traditional 4-year degrees.

- Build the Technological Infrastructure Necessary for the Future of Work. In response to the "Call to Action" recommendations approved by the Advisory Board in May 2020, the Increase Data Transparency to Better Match American Workers with American Jobs Working Group expanded its scope and changed its name to the Build the Technological Infrastructure Necessary for the Future of Work Working Group. The working group's scope now includes digital infrastructure investment as described in the "Digital Infrastructure Principles" approved by the Advisory Board at the June 2020 meeting. Our nation cannot achieve a satisfactory economic recovery unless the technological infrastructure is in place to connect and empower all Americans to participate in the workforce. High-quality, transparent, and timely data can significantly improve the ability of employers, students, job seekers,

education providers, and policymakers to make informed choices about education and employment—especially for matching education and training programs to in-demand jobs and the skills needed to fill them.

- Modernize Candidate Recruitment and Training Practices. Employers often struggle to fill job vacancies, yet their hiring practices may actually reduce the pool of qualified job applicants. To acquire a talented workforce, employers must better identify the skills needed for specific jobs and communicate those needs to education providers, job seekers, and students.

- Measure and Encourage Employer-led Training Investments. The size, scope, and impacts of education and skills training investments are still not fully understood. There is a lack of consistent data on company balance sheets and in federal statistics. Business and policy makers need to know how much is spent on training, the types of workers receiving training, and the long-term value of the money and time spent in classroom and on-the-job training.

Sabrina L. Montes,

Designated Federal Official, American Workforce Policy Advisory Board, Bureau of Economic Analysis.

The annual reports submitted by grantees are the only complete source of compiled information on FTZs. The data and information contained in the reports relates to international trade activity in FTZs. The reports are used by the Congress and the Department to determine the economic effect of the FTZ program. The public uses the information regarding activities carried out in FTZs to evaluate their effect on industry sectors. The information contained in annual reports also helps zone grantees in their marketing efforts. This is a request for a renewal of a currently approved information collection.
