

Methods for Estimating the Chronic Toxicity of Effluents and Receiving Water to Freshwater Organisms, Third Edition, July 1994 (EPA/600/4-91/002); and *Short-Term Methods for Estimating the Chronic Toxicity of Effluents and Receiving Water to Marine and Estuarine Organisms*, Second Edition, July 1994 (EPA/600/4-91/003). In 1999, EPA promulgated technical corrections that incorporated an errata document into the WET Methods rule. EPA intended that the errata document correct minor errors and omissions, provide clarification, and establish consistency among the WET rule and test manuals (64 FR 4975, February 2, 1999).

Today's notice announces the availability of an additional document, "Method Guidance and Recommendations for Whole Effluent Toxicity (WET) Testing (40 CFR Part 136)," EPA/821/B-00/004. This guidance document provides clarification and recommendations to EPA Regional, State, Tribal and local regulatory authorities; regulated entities; and environmental laboratories regarding specific recommended and/or suggested technical elements of the WET test methods. The document provides specific guidance on nominal error rate assumption adjustments, confidence intervals, concentration-response relationships, dilution series selection, and dilution water. EPA prepared the document as part of a settlement agreement to resolve litigation challenging the rulemaking that standardized the testing procedures. The complete text of this **Federal Register** notice and the subject guidance document may be viewed or downloaded on the Internet at <http://www.epa.gov/OST/WET/>.
