information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: The annual public reporting and recordkeeping burden for

this collection of information is broken down as follows:

Type of permit action	Major PSD	Major Part D	Minor
Number of sources	265	488	74,500
Burden Hours per Response:			
Industry	839	577	40
Permitting Agencies	272	109	30

Respondents/Affected Entities:
Industrial plants, State and local permitting agencies.

Estimated Number of Respondents:
(150,723).

Frequency of Response: (1 per respondent).

Estimated Total Annual Hour Burden:
(5,851,126) hours.

Estimated Annualized Cost Burden:
\$(0).

The estimated total annual burden is adjusted upward by 1,135,866 hours. The actual change in burden is 0, but there is an adjustment of \$73.286 million upward due to the upward adjustment in the number of minor source actions estimated for this renewal. The revised number of minor source actions results from the upward revision to the number of reviewing authorities and the estimated number of actions per reviewing authority. The total number of respondents is increased by 35,903. The burden per type of permit remains unchanged.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and, transmit or otherwise disclose the information.

ICR Title: Plant-Incorporated Protectants; CBI Substantiation and Adverse Effects Reporting

ICR Status: This is a request for extension of an existing approved collection that is currently scheduled to expire on July 31, 2004. EPA is asking OMB to approve this ICR for three years. Under 5 CFR 1320.12(b)(2), the Agency may continue to conduct or sponsor the collection of information while the submission is pending at OMB.

Abstract: On January 16, 2001, EPA promulgated a final rule that addresses the regulatory status of pesticidal substances that are produced by plants (plant-incorporated protectants). This Information Collection Request (ICR) covers the two information collection related provisions contained in the final rule: the provision that requires registrants that make Confidential Business Information (CBI) claims to substantiate such claims when they are made, and the provision that requires manufacturers of plant-incorporated protectants exempted from requirements of registration under the final rule to report adverse effects to the Agency.

Burden Statement: The annual "respondent" burden for this ICR is estimated to average about 22 hours per response. According to the Paperwork Reduction Act, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For this collection, it is the time reading the regulations, planning the necessary data collection activities, conducting tests, analyzing data, generating reports and completing other required paperwork, and storing, filing, and maintaining the data. The agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection appears at the beginning and the end of this document. In addition OMB control numbers for EPA's regulations, after initial display in the final rule, are listed in 40 CFR part 9.

The following is a summary of the burden estimates taken from the ICR:

Respondents/affected entities:

Persons or companies involved with agricultural biotechnology that may develop and market plant incorporated protectants.

Estimated total number of potential respondents: 14.

Frequency of response: On occasion.

Estimated total/average number of responses for each respondent: 1.

Estimated total annual burden hours: 303.

Estimated total annual burden costs: \$27,572.

Changes in the ICR Since the Last Approval:

The total estimated annual respondent burden for this ICR has decreased 1,067 hours, from 1,370 hours to 303; and the cost has decreased \$92,420, from \$119,992 to \$27,572, because the previous ICR included an estimated 1,067 hours for respondents to familiarize themselves with the requirements of the rule, which was promulgated in 2001. This decrease is explained more fully in the ICR.

List of Subjects:

EPA, pesticides, pesticide registration, information collection.
