

normal (31,600 acre-feet per year), or dry (40,000 acre-feet per year). Of the total quantity pumped, a maximum of 25,000 acre-feet per year would be exchanged with Reclamation. This water would be made available to Reclamation in the Mendota Pool to offset their existing water contract obligations. In exchange, Reclamation would make an equivalent amount of CVP water available to the members of the Mendota Pool Group for irrigation purposes at Check 13 of the Delta-Mendota Canal. Any quantity of water pumped beyond the 25,000 acre-feet exchanged would be delivered directly to other lands that are presently under irrigation around the Pool. As part of this program, a maximum of 12,000 acre-feet per year of groundwater would be pumped from deep wells (i.e., screened interval greater than 130 feet deep), with the remainder coming from shallow wells (i.e., screened interval less than 130 feet deep). The proposed project will comply with the terms specified in the Settlement Agreement for Mendota Pool Transfer Pumping Program, effective January 1, 2001.

The primary environmental resource issues that have been identified, and that will be evaluated in the EIS, include groundwater levels, groundwater quality, subsidence, surface water quality, and biological resources.

The environmental review will be conducted pursuant to NEPA, the Endangered Species Act, and other applicable laws, to analyze the potential environmental impacts of implementing each of the feasible alternatives. All reasonable alternatives as required by NEPA and its implementing regulations will be examined. The final Environmental Impact Report, certified by Westlands Water District in 1998, will provide a useful beginning, as will subsequent environmental reports and ongoing sampling activities, thus allowing Reclamation to expedite completion of the analysis. Alternatives, with their related designs and cost estimates identified in the earlier document, will be re-evaluated and updated to reflect current conditions. Public input on additional alternatives, or combinations of alternatives, that should be considered will be sought through the initial scoping meeting. In addition, public input will be sought on the criteria that should be used to carry forward alternatives, or combination of alternatives, for further consideration.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home

address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment letter. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials or organizations or businesses, available for public disclosure in their entirety.

Dated: December 3, 2001.

Frank Michny,

Regional Environmental Officer.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Glen Canyon Dam Adaptive Management Work Group (AMWG), Notice of Meeting

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of public meeting.

SUMMARY: The Adaptive Management Program (AMP) was implemented as a result of the Record of Decision on the Operation of Glen Canyon Dam Final Environmental Impact Statement to comply with consultation requirements of the Grand Canyon Protection Act (Pub. L. 102-575) of 1992. The AMP provides an organization and process to ensure the use of scientific information in decision making concerning Glen Canyon Dam operations and protection of the affected resources consistent with the Grand Canyon Protection Act. The AMP has been organized and includes a federal advisory committee (the AMWG), a technical work group (the TWG), a monitoring and research center, and independent review panels. The TWG is a subcommittee of the AMWG and provides technical advice and information for the AMWG to act upon. **DATES AND LOCATION:** The Glen Canyon Dam Adaptive Management Work Group will conduct the following public meeting.

Phoenix, Arizona—January 17–18, 2002. The meeting will begin at 9:30 a.m. and conclude at 5 p.m. on the first day and will begin at 8 a.m. and conclude at 12 noon on the second day. The meeting will be held at the Bureau of Indian Affairs,—Western Regional Office, 2 Arizona Center, Conference

Rooms A and B (12th Floor), 400 North 5th Street, Phoenix, Arizona.

Agenda: The purpose of the meeting will be to approve the Strategic Plan, and discuss the following: FY 2003 budget, basin hydrology, Protocol Evaluation Panel (PEP) recommendations, environmental compliance, and other administrative and resource issues pertaining to the AMP.

Agenda items may be revised prior to any of the meetings. Final agendas will be posted 15 days in advance of each meeting and can be found on the Bureau of Reclamation Web site under Environmental Programs at: <http://www.uc.usbr.gov>. Time will be allowed on each agenda for any individual or organization wishing to make formal oral comments (limited to 10 minutes) at the meetings.

ADDRESSES: To allow full consideration of information by the AMWG members, written notice must be provided to Randall Peterson, Bureau of Reclamation, Upper Colorado Regional Office, 125 South State Street, Room 6107, Salt Lake City, Utah 84138-1147; telephone (801) 524-3758; faxogram (801) 524-3858; E-mail at rpeterson@uc.usbr.gov at least FIVE (5) days prior to the meeting. Any written comments received will be provided to the AMWG members at the meeting.

FOR FURTHER INFORMATION CONTACT: Randall Peterson, telephone (801) 524-3758; faxogram (801) 524-3858; rpeterson@uc.usbr.gov.

Dated: November 30, 2001.

Rick L. Gold,

Regional Director.
