SUPPLEMENTARY INFORMATION:

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. 93-275, 15 U.S.C. 761 *et seq.*) and the DOE Organization Act (Pub. L. 95-91, 42 U.S.C. 7101 *et seq.*) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) under section 3507(a) of the Paperwork Reduction Act of 1995.

The Manufacturing Energy Consumption Survey (MECS) is a mail survey designed to collect energy consumption and expenditures data from establishments in the manufacturing sector; *i.e.*, North American Industry Classification System (NAICS) codes 31-33. There are three MECS data collection forms and their use depends on an establishment's primary business activity classification under NAICS. Form EIA-846A collects information for all the manufacturing industries contained within NAICS 31-33 except for NAICS 321, 322, 324, 325, and 331111. Form EIA-846B is for establishments operating primarily in the petroleum refining industry (NAICS 324110). Form EIA-846C is for
