

side of the channel. These findings were corroborated by the results of more recent studies on sediment transport in the project area performed on behalf of the Corps in 2006.

Need for Action: The Corps has requested the permanent, Section 102(c) designation of the ODMDS-West for the disposal of maintenance-dredged material from the ARBC when ocean disposal is the preferred disposal alternative. Placement of dredged material at the ODMDS-West would reduce the amount and rate of shoal material runback into the ARBC (i.e., reduce the shoaling rate), and thus, decrease the overall annual maintenance dredging effort needed for the ARBC while providing vessels with a longer period of safe navigation access between maintenance dredging events. An EIS is required to provide the necessary information to evaluate alternatives and designate the preferred ODMDS.

Alternatives: "No action" alternative. The no action alternative is defined as not designating an ocean disposal site. Additional alternatives under consideration include: Non-ocean (beneficial use) placement alternatives; Nearshore Area Disposal Site; Mid-shelf Area Disposal Site; and a Deepwater Area Disposal Site.

Scoping: Scoping will be accomplished by correspondence with affected Federal, State, and local agencies, and with anticipated interested parties. Appropriate Federal, State, and local entities will be invited to participate as a cooperating agency. Scoping will be initiated with the distribution of a scoping input request letter. If, based on the results of the comments received from the public scoping letter, there are identified significant interests and concerns expressed by the public, a public meeting may be needed.

Estimated Date of Release: The Draft EIS will be made available in December 2011.

Dated: July 8, 2011.
