Petition Finding

After reviewing the information contained in the petition, as well as information readily available in our files, and based on the above analysis, we conclude that the petition does not present substantial scientific or commercial information indicating that the petitioned action of identifying the winter-run Puget Sound chum salmon (Oncorhynchus keta) in the Nisqually River system and Chambers Creek as an ESU may be warranted. As such, we find that the petition does not present substantial scientific or commercial information indicating that the winterrun Puget Sound chum salmon in the Nisqually River system and Chambers Creek populations are "species" eligible for listing under the ESA.
