Agricultural Marketing Service

Title: Fruit and Vegetable Market News Reports.

OMB Control Number: 0581–0006.

Summary of Collection: Section 203(g) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1621) directs and authorizes the collection of information and disseminating of marketing information including adequate outlook information on a market-area basis for the purpose of anticipating and meeting consumer requirements, aiding in the maintenance of farm income and bring about balance between production and utilization of agriculture products. The fruit and vegetable industries, through their organizations, or government agencies present formal requests that the Department of Agriculture issue daily, weekly, semi-monthly, or monthly market news reports on various aspects of the industry.

Need and Use of the Information: AMS will collect information on some 330 ornamentals, fresh fruit and vegetables, and specialty crops for the production of Market News reports that are then available to the industry and other interested parties in various formats. Information is provided on a voluntary basis and collected in person through face-to-face interviews and by confidential telephone throughout the country by market reporters. The absence of these data would deny primary and secondary users information that otherwise would be available to aid them in their production and marketing decisions, analyses, research and knowledge of current market conditions. The omission of these data could adversely affect prices, supply, and demand.

Description of Respondents: Farms; business or other for-profit.

Number of Respondents: 3,168.

Summary of Collection: The Agricultural Marketing Act of 1946 (60 Stat. 1087–1091, as amended; 7 U.S.C. 1621–1627) (AMA) directs and authorizes the Department to develop standards of quality, grades, grading programs, and services to enable a more orderly marketing of agricultural products so trading may be facilitated and so consumers may be able to obtain products graded and identified under USDA programs. Animal and Plant Health Inspection Service

Title: Highly Pathogenic Avian Influenza, All Subtypes, and Newcastle Disease; Additional Restrictions.

OMB Control Number: 0579-0245.

Summary of Collection: The Animal Health Protection Act (AHPA), 7 U.S.C 8301, is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The agency charged with carrying out this disease prevention mission is the Animal and Plant Health Inspection Service (APHIS), through its Veterinary Services (VS) Program. Highly pathogenic avian influenza (HPAI) and Newcastle Disease are extremely infectious and often fatal disease affecting all types of birds and poultry.

Need and Use of the Information: To protect the United States against an incursion of HPAI and Newcastle Disease, APHIS requires the use of several information collection activities, including an USDA-APHIS-VS Application For Permit To Import or Transport Controlled Materials or

Organisms or Vectors (VS Form 16-3); a United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors (VS Form 16-6A); an Application for Approval or Report of Inspection Establishment Handling Restricted Animal Byproducts or Controlled Materials (VS Form 16-25); USDA-APHIS-VS Agreement for Handling Restricted Imports of Animal By-Products and Controlled Materials (VS Form 16-26); USDA-APHIS-VS Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material (VS Form 16-78); USDA-APHIS-VS Application for Import or in Transit Permit (Animals, Animal Semen, Animal Embryos, Birds, Poultry, and Hatching Eggs) (VS Form 17-129); USDA-APHIS Agreement of Pet Bird Owner (VS Form 17-8); application of seals and agreements; notarized declaration or affirmation; notification of signs of disease in a recently imported bird; cooperative service agreements, and recordkeeping by processing establishments. APHIS will collect information to ensure that U.S. birds and poultry undergo appropriate examinations before entering the United States. Without the information, it would be impossible for APHIS to establish an effective line of defense against an introduction of HPAI and Newcastle Disease.

Description of Respondents:

Individuals or households; Business or other for-profit; Not-for-profit institutions; Federal Government.

Number of Respondents: 1,680.

Frequency of Responses: Reporting and Recordkeeping; On occasion.
