

for its requested vehicle line, the manufacturer must formally notify the agency. If such a decision is made, the line must be fully marked as required by 49 CFR 541.5 and 541.6 (marking of major component parts and replacement parts).

NHTSA notes that if any manufacturer listed in this notice wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Section 543.8(d) states that a Part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, section 543.10(c)(2) provides for the submission of petitions "to modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in the exemption."

The agency wishes to minimize the administrative burden that section 543.10(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting Part 543 to require the submission of a modification petition for every change to the components or design of an antitheft device. The significance of many such changes could be de minimis. Therefore, NHTSA suggests that if any manufacturer listed in this notice contemplates making any changes, the effects of which might be characterized as de minimis, it should consult the agency before preparing and submitting a petition to modify.

For the foregoing reasons, the agency hereby grants in full the following petitions for exemption for the following manufacturers' vehicle lines

for the following model years: Ford Motor Company (Ford) for its Bronco Sport vehicle line beginning in MY 2021; Jaguar Land Rover North America LLC (Jaguar Land Rover) for its Jaguar I-Pace vehicle line beginning in MY 2021; American Honda Motor Co., Inc. (Honda) for its HR-V beginning in MY 2021; and Volkswagen Group of America, Inc. (Volkswagen) for its ID.4 beginning in MY 2021.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95 and 501.8.
