Vol. 87, No. 88

Friday, May 6, 2022

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Notice of May 23, 2022 Meeting of the Board for International Food and Agricultural Development

AGENCY: Agency for International Development.

ACTION: Notice of meeting; request for comment.

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a public meeting of the Board for International Food and Agricultural Development (BIFAD), The Global Food Security Crisis: Exploring the Evidence Base and Lessons from the Past to Strengthen Agricultural, Nutrition, and Food Systems in the Face of Shocks. The meeting will be held on May 23, 2022 from 12:00 to 2:30 EDT online, with designated times for public comment from 1:30-1:50 p.m. EDT and from 2:15-2:20 p.m. EDT. The meeting will be livestreamed via Zoom (registration required) and accessible at the following link: https:// us06web.zoom.us/webinar/register/WN_ vCZ3oZYDTAyEEcq14OwKIA.

The BIFAD is a seven-member, presidentially appointed advisory board to USAID established in 1975 under Title XII of the Foreign Assistance Act, as amended, to ensure that USAID brings the assets of U.S. universities to bear on development challenges in agriculture and food security and supports their representation in USAID programming. This will be the first public meeting of BIFAD members appointed by President Joseph Biden on January 14, 2022 and will include an introduction to newly appointed BIFAD members, a briefing on BIFAD's current work plan priorities, and an overview of key upcoming initiatives. Public comment is invited to further inform BIFAD's work.

In the face of short-term and longterm shocks, fragile food systems are driving increases in poverty, hunger, and child stunting. The global effort to end hunger and poverty is at a critical moment, with Russia's invasion of Ukraine adding to an already-compounded global food crisis as countries struggle to recover from the impacts of COVID–19, humanitarian emergencies and climate change.

What does it mean to get ahead of future crises and to build resilient food systems? What are the lessons learned from previous crises, including the COVID-19 pandemic and the 2007-2008 global food price crisis? BIFAD will take stock of evidence around these questions and identify weak links in food systems that must be strengthened to respond to global food security crises and to mitigate the impacts of current and future shocks. Food systems, nutrition, and humanitarian assistance experts will share lessons learned about resilience in the face of these disruptions. Evidence-based recommendations from these deliberations will inform USAID strategy implementation, policy, and programming.

For questions about registration, please contact Carol Chan at *carol.chan@tetratech.com*. For questions about BIFAD, or to submit written public comments in advance, please contact Clara Cohen, Designated Federal Officer for BIFAD in the Bureau for Resilience and Food Security at USAID. Interested persons may email her at *ccohen@usaid.gov* or telephone her at (202) 712–0119.

Clara Cohen,

Designated Federal Officer, BIFAD. [FR Doc. 2022–09707 Filed 5–5–22; 8:45 am]

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have

practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by June 6, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: Control of African Swine Fever; Restrictions on the Movement of Swine Products and Swine Byproducts from Puerto Rico and the U.S. Virgin Islands.

OMB Control Number: 0579-0480. Summary of Collection: Under the Animal Health Protection Act (7 U.S.C. 8301 et seq.) the Secretary of the U.S. Department of Agriculture (USDA) is authorized to protect the health of the livestock, poultry, and aquaculture populations in the United States by preventing the introduction and interstate spread of serious diseases and pests, and for eradicating such diseases and pests from the United States, when feasible. Within the USDA, the Animal and Plant Health Inspection Service (APHIS Veterinary Services (VS) is tasked with preventing foreign animal disease outbreaks in the United States, and monitoring, controlling, and eliminating a disease outbreak should
