National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before September 17, 2016, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by October 24, 2016.

ADDRESSES: Comments may be sent via U.S. Postal Service to the National Register of Historic Places, National Park Service, 1849 C St. NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St. NW., 8th Floor, Washington, DC 20005; or by fax, 202-371-6447.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before September 17, 2016. Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. Notice of Availability for the Final Environmental Impact Statement for the Long-Term Experimental and Management Plan for the Operation of Glen Canyon Dam, Page, Arizona

AGENCY: Bureau of Reclamation and
National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: The Department of the Interior, through the Bureau of Reclamation and National Park Service, has prepared a Final Environmental Impact Statement (FEIS) for the Long-Term Experimental and Management Plan (LTEMP) for the operation of Glen Canyon Dam and related non-flow actions. The LTEMP would provide a framework for adaptively managing Glen Canyon Dam operations over the next 20 years consistent with the Grand Canyon Protection Act of 1992 and other provisions of applicable Federal law.

DATES: The Department of the Interior will not issue a final decision on the proposed action for a minimum of 30 days after the date that the Environmental Protection Agency publishes its Notice of Availability of Weekly Receipt of Environmental Impact Statements in the **Federal Register**. After the 30-day public review period, the Department of the Interior will complete a Record of Decision (ROD). The ROD will state the action that will be implemented and discuss all factors leading to that decision.

ADDRESSES: Electronic copies of the FEIS are available at the Glen Canyon Dam LTEMP EIS Web site located at: <http://ltempeis.anl.gov/>. See the **SUPPLEMENTARY INFORMATION** section for a list of locations where compact disc copies of the FEIS are available for public inspection.

FOR FURTHER INFORMATION CONTACT: Ms. Katrina Grantz, Chief, Adaptive Management Group, Bureau of

Reclamation, kgrantz@usbr.gov, 801-524-3635; or Mr. Rob Billerbeck, Colorado River Coordinator, National Park Service, Rob_P_Billerbeck@nps.gov, 303-987-6789.

Persons who use a telecommunications device for the deaf may call the Federal Relay Service at 1-800-877-8339 to contact the above individuals during normal business hours. The Service is available 24 hours a day, 7 days a week, in order to leave a message or question with the above named individuals. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Pursuant to the National Environmental Policy Act of 1969, as amended, the Bureau of Reclamation (Reclamation) and the National Park Service (NPS) jointly prepared the FEIS for the LTEMP in cooperation with 15 cooperating agencies including three Federal agencies, six non-Federal agencies, and six American Indian tribes. A primary function of the LTEMP will be the implementation of monthly, daily, and hourly releases from Glen Canyon Dam and related non-flow actions as part of an experimental adaptive management program in accordance with the Grand Canyon Protection Act of 1992 (GCPA) and in coordination with the Glen Canyon Dam Adaptive Management Program. This will be the first EIS completed on the monthly, daily, and hourly operations of Glen Canyon Dam since 1995, which was a major point of demarcation in attempting to achieve a balance between project purposes and natural resources protection.

The Draft Environmental Impact Statement (DEIS) for the LTEMP was filed with the Environmental Protection Agency and issued to the public on January 8, 2016, and a Notice of Availability of the DEIS was published in the **Federal Register** on that same date (81 FR 963). A 122-day public review and comment period for the DEIS ended on May 9, 2016 (extended 32 days from the original 90-day comment period which ended on April 7, 2016). During the public comment period, two public meetings and two public web-based meetings were held to present information and answer any clarifying questions. Public reaction determined through the scoping process and subsequent outreach efforts has been instrumental in assuring a full range of alternatives. The FEIS contains responses to all comments received on the DEIS.

Proposed Federal Action

The proposed Federal action is the development and implementation of a

structured, long-term experimental and management plan for operations of Glen Canyon Dam. The LTEMP and the Secretary of the Interior's (Secretary) decision would provide a framework for adaptively managing Glen Canyon Dam operations and other management and experimental actions over the next 20 years consistent with the GCPA and other provisions of applicable Federal law.

The LTEMP would determine specific options for dam operations (including hourly, daily, and monthly release patterns), non-flow actions, and appropriate experimental and management actions that will meet the GCPA's requirements, maintain or improve hydropower production to the greatest extent practicable, consistent with improvement of downstream resources, including those of importance to American Indian tribes.

Purpose and Need for the Proposed Federal Action

The proposed Federal action will help determine specific dam operations and actions that could be implemented to improve conditions and continue to meet the GCPA's requirements and to minimize—consistent with law—adverse impacts on the downstream natural, recreational, and cultural resources in Glen Canyon National Recreation Area and Grand Canyon National Park, including resources of importance to American Indian tribes.

The need for the proposed Federal action stems from the need to use scientific information developed since the 1996 ROD to better inform the public of Department of the Interior decisions on dam operations and other management and experimental actions so that the Secretary may continue to meet statutory responsibilities for protecting downstream resources for future generations, conserving species listed under the Endangered Species Act, avoiding or mitigating impacts on *National Register of Historic Places*—eligible historic properties, and protecting the interests of American Indian tribes, while meeting obligations for water delivery and the generation of hydroelectric power.

The FEIS Analyzes Seven Alternatives

The FEIS assesses the potential environmental effects of seven alternatives being considered: The No-Action Alternative (Alternative A) and six Action Alternatives (Alternatives B, C, D, E, F, and G), which are described below. There are a number of experimental and management actions that would be incorporated into all of
