BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2021-0669; FRL-9116-04-OAR]

Phasedown of Hydrofluorocarbons: Notice of 2024 Allowance Allocations for Production and Consumption of Regulated Substances Under the American Innovation and Manufacturing Act of 2020, and Notice of Final Administrative Consequences

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has issued calendar year 2024 allowances for the production and consumption of hydrofluorocarbons in accordance with the Agency's regulations. This issuance of allowances is undertaken pursuant to the American Innovation and Manufacturing Act, which directs the Environmental Protection Agency by October 1 of each calendar year to determine the quantity of production and consumption allowances for the following calendar year. In this notice, the Agency is also providing notice of separate Agency actions finalizing administrative consequences for certain entities. These

administrative consequences were applied to withhold, retire, and revoke entities' remaining calendar year 2023 and newly issued calendar year 2024 allowances in accordance with the administrative consequence regulatory provisions.

SUPPLEMENTARY INFORMATION:

Subsection (e)(2)(D)(i) of the American Innovation and Manufacturing Act of 2020 (AIM Act) directs the Environmental Protection Agency (EPA) to determine, by October 1 of each calendar year, the quantity of allowances for the production and consumption of regulated substances that may be used for the following calendar year. EPA has codified the production and consumption baselines and phasedown schedules for regulated substances in 40 CFR 84.7. Under the phasedown schedule, for 2024, total production allowances may not exceed 229,521,263 metric tons of exchange value equivalent (MTEVe) and total consumption allowances may not exceed 181,522,990 MTEVe.

EPA regulations at 40 CFR part 84, subpart A, outline the process by which the Agency determines the number of allowances each entity is allocated. EPA allocated allowances consistent with this process for calendar year 2024, and has posted entity-specific allowance allocations on its website at <https://www.epa.gov/climate-hfcs-reduction>. An allowance allocated under the AIM Act does not constitute a property right and is a limited authorization for the production or consumption of a regulated substance.

Note that while allowances may be transferred or conferred once they are allocated, they can only be expended to cover imports and production in the calendar year for which they are allocated. In other words, calendar year 2024 allowances may only be expended for production and import of bulk HFCs between January 1, 2024, and December 31, 2024.

Application-Specific Allowances

EPA established the methodology for issuing application-specific allowances

in the 2021 final rule titled *Phasedown of Hydrofluorocarbons: Establishing the Allowance Allocation and Trading Program Under the American Innovation and Manufacturing Act* (86 FR 55116) and codified the methodology for issuing allowance allocations in 40 CFR 84.13. Because application-specific allowances can be expended to either produce or import HFCs, and application-specific allowances must be provided from within the overall annual production and consumption caps, EPA subtracts the amount of application-specific allowances allocated from both the production and consumption general allowance pools. EPA issues application-specific allowances to end users in five applications established by the AIM Act: propellants in metered dose inhalers (MDIs), defense sprays, structural composite preformed polyurethane foam for marine use and trailer use, etching of semiconductor material or wafers and the cleaning of chemical vapor deposition chambers within the semiconductor manufacturing sector, and onboard aerospace fire suppression. Additionally, EPA issues application-specific allowances to the U.S. Department of Defense for mission-critical military end uses.

EPA's 2023 final rule titled *Phasedown of Hydrofluorocarbons: Allowance Allocation Methodology for 2024 and Later Years* (88 FR 46836), updated the methodology for how the Agency would issue production and consumption allowances for 2024 through 2028. These updates are codified in 40 CFR 84.9 (production) and 40 CFR 84.11 (consumption), and EPA is issuing allowances to entities who meet the criteria in the regulations, including those who were previously issued consumption allowances as new market entrants pursuant to 40 CFR 84.15.

EPA's final calculations for allocation of allowances for each entity on September 29, 2023, follows below. EPA followed the methodology from the applicable regulations in determining allocations, *i.e.*, 40 CFR 84.13 for application-specific allowances, 40 CFR 84.9 for production allowances, and 40 CFR 84.11 for consumption allowances.

Applying the methodology codified in 40 CFR 84.13, EPA allocated the number of application-specific allowances shown in Table 1.
