POLICY JUSTIFICATION

Saudi Arabia - Multifunctional Information Distribution System/Low Volume Terminals

The Government of Saudi Arabia has requested a possible sale of 80 Link 16 Multifunctional Information Distribution System/Low Volume Terminals (MIDS/LVT-1) to be installed on United Kingdom Eurofighter Typhoon aircraft, data transfer devices, installation, testing, spare and repair parts, support equipment, personnel training, training equipment, contractor engineering and technical support, and other related elements of program support. The estimated cost is \$31 million.

This sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been and continues to be an important force for political stability and economic progress in the Middle East.

The MIDS terminals will increase pilot operational effectiveness by at-a-glance portrayal of targets, threats, and friendly forces on an easy-to-understand relative position display. This proposed system will increase combat effectiveness while reducing the threat of friendly fire. The system will foster interoperability with the U.S. Air Force and other countries. MIDS/LVT-1 will provide allied forces greater situational awareness in any coalition operation.

The proposed sale of this equipment and support will not alter the basic military balance in the region. Saudi Arabia is capable of absorbing and maintaining these additional MIDS/LVT-1 terminals in its inventory.

The prime contractor will be Data Link Solutions, LLC of Cedar Rapids, Iowa. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government and contractor representatives to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 08-101**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vii****(vii) Sensitivity of Technology:**

1. The Multifunctional Information Distribution System/Low Volume Terminals (MIDS/LVT-1) Communications Security (COMSEC) device provides improved situational awareness and sensor cueing in support of air superiority and interdiction missions. The Link 16 tactical data link provides networking with other Link 16 capable aircraft, command, and control systems. The MIDS/LVT-1 are Controlled Cryptographic Items (CCI) to which access is restricted. Special shipping and handling procedures are in place for CCI hardware. The hardware and software are unclassified with embedded COMSEC chips.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
