provides an understanding of broadband and voice subscribership, and, through its critical connection to the Broadband Data Collection, the extent of broadband availability. The understanding of broadband subscribership and availability provided by these data are the foundation of the Commission's development of appropriate broadband policies, and enable the Commission to carry out its obligation under section 706 of the Telecommunications Act of 1996, as amended, to "determine whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion." In addition, the information collected in Form 477 enhances the Commission's analysis and understanding of the extent of voice telephone services competition, which in turn supports the Commission's efforts to open all telecommunications markets to competition and to promote innovation and investment by all participants, including new entrants, as required by the Telecommunications Act of 1996.

The Commission staff uses the information to advise the Commission about the efficacy of its rules and policies adopted to implement the Telecommunications Act of 1996. The data are necessary to evaluate the status of local telecommunications competition and broadband availability. The Commission uses the data to prepare reports that help inform consumers and policy makers at the federal and state level on the availability and adoption of broadband services, as

well as on developments related to competition in the voice telephone services market. The Commission also uses the data to support its analyses in a variety of rulemaking proceedings under the Communications Act, including those related to fulfilling its universal service mandate.

The Commission releases to the public the broadband availability and mobile voice availability data that it began collecting in 2014 as a result of the Order. This information is used by consumers, federal and state government agencies, analysts, and others to determine broadband service availability by provider, technology, and speed.

Federal Communications Commission.

In particular, GSA would like to discuss: a resource that GSA publishes titled “Tribes and Tribal Organizations: Guide to Using GSA Solutions”; a special GSA initiative around Carbon Pollution-Free Electricity Procurement; and a special GSA initiative relating to Electric Vehicles. GSA recognizes that formal consultation with Tribal Nations is essential as GSA takes actions to implement and develop policies that might affect them.

SUPPLEMENTARY INFORMATION:

Background

GSA is consulting with Tribal governments about their interests and concerns surrounding GSA’s support of Tribes with a focus on three agency initiatives.

Tribes and Tribal Organizations—Guide To Using GSA Solutions

“Tribes and Tribal Organizations: Guide to Using GSA Solutions” outlines how Tribes and Tribal organizations are eligible to use GSA solutions in the procurement of goods and services. The guide explains the various authorities that support Tribes’ and Tribal organizations’ use of GSA sources and programs, and identifies resources currently available for use. GSA’s intent in consulting on this document, which is continuously in the process of being

updated, is to invite Tribal feedback to assist GSA in improving the existing guidance to help ensure that it speaks to needs that are unique to Tribes and better supports future Tribal acquisitions.

Implementation of the Indian Energy Purchase Preference at Federal Facilities

As part of its second Tribal National Summit on November 30, 2022, the Biden-Harris administration announced its commitment to ensure that investments in the clean energy economy reach Tribal lands. GSA will lead a pilot focused on Tribal energy production to develop procurement strategies. GSA’s intent in consulting on this topic is to gain important insight directly from Tribes, tribally owned businesses, Tribal utilities, and Tribal entrepreneurs regarding the availability, development, or challenges associated with generating and/or selling carbon pollution-free electricity to the Federal Government in order to inform GSA’s development of the pilot.

Electric Vehicle (EV) Initiative for Tribal Nations

The EV Initiative for Tribal Nations helps to ensure that Tribal Nations and Native communities are part of the EV future of the country. To support this initiative, GSA is seeking input to understand Tribal Nations’ role and needs as GSA, subject to applicable authorities, assists Tribes with purchasing or leasing electric vehicles, mapping the Federal facilities in Indian country to support EV infrastructure deployment, and expanding training for Tribal members on the GSA solutions available.

You can register for the Consultation and find supporting documentation at <https://www.gsa.gov/resources/native-american-tribes>. These documents are intended to help Tribal leaders anticipate discussion items for consultation and consider Tribal interests related to the topics. The official comment period for this consultation will remain open for 30 days after the in-person consultation session takes place. However, our partnership with Tribal leadership will remain ongoing.
