Title: TSCA Section 4 Test Rules, Consent Orders, Test Rule Exemptions, and Voluntary Data Submission.

ICR Numbers: EPA ICR No. 1139.08, OMB Control No. 2070-0033.

ICR Status: This ICR is currently scheduled to expire on June 30, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 4 of the Toxic Substances Control Act (TSCA) is designed to assure that chemicals that may pose serious risks to human health or the environment undergo testing by manufacturers or processors, and that the results of such testing are made available to EPA. EPA uses the information collected under the authority of TSCA section 4 to assess risks associated with the manufacture, processing, distribution, use or disposal of a chemical, and to support any necessary regulatory action with respect to that chemical.

EPA must assure that appropriate tests are performed on a chemical if it decides: (1) That a chemical being considered under TSCA section 4(a) may pose an "unreasonable risk" or is produced in "substantial" quantities that may result in substantial or significant human exposure or substantial environmental release of the chemical; (2) that additional data are needed to determine or predict the

impacts of the chemical's manufacture, processing, distribution, use or disposal; and (3) that testing is needed to develop such data. Rules and consent orders under TSCA section 4 require that one manufacturer or processor of a subject chemical perform the specified testing and report the results of that testing to EPA. TSCA section 4 also allows a manufacturer or processor of a subject chemical to apply for an exemption from the testing requirement if that testing will be or has been performed by another party. This information collection applies to reporting and recordkeeping activities associated with the information that EPA requires industry to provide in response to TSCA section 4 test rules, consent orders, test rule exemptions and other data submissions.

Responses to the collection of information are mandatory (see 40 CFR part 790). Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 232 hours per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are persons who manufacture, process or import, use, distribute or dispose of one or more specified chemical substances.

Frequency of Collection: On occasion.

Estimated No. of Respondents: 58.

Estimated Total Annual Burden on Respondents: 151,962 hours.

Estimated Total Annual Costs: \$5,845,639.

Changes in Burden Estimates: There is a net decrease of 51,052 hours (from 203,014 hours to 151,962 hours) in the total estimated respondent burden

compared with that currently in the OMB inventory. This decrease reflects EPA's revised estimates of the number of test rules and consent orders that the Agency expects to issue in the future, as well as revised estimates of the amount of testing still to be done under EPA's HPV Challenge program. The Supporting Statement includes detailed analyses of these revised estimates. This change is an adjustment.

Dated: June 9, 2008.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
