Background

The FHWA intends to adopt the approved Final EIS for the Tamiami Trail Modifications: Next Steps, prepared by the NPS. The FHWA adoption is proposed in order to meet the agency's National Environmental Policy Act (NEPA) requirements associated with the use of U.S. Department of Transportation funds for this action and possible involvement of FHWA in the implementation of the project, as proposed in the NPS Tamiami Trail Modifications: Next Steps Final EIS. The project consists of modifications to the Tamiami Trail, including bridging and road raising, required to restore the ecological conditions in Northeast Shark River Slough and the Water Conservation Areas and establish the foundation for future restoration efforts in the Everglades. The Final EIS considered the social, environmental, and economic impacts of the project. The No-Action Alternative and five Action Alternatives were considered in the Final EIS. All of the Action Alternatives included bridge construction and reconstruction of the

remaining highway, with differences being in the bridge lengths and locations. Generally, where bridging of the Tamiami Trail is to occur, the bridges will be constructed adjacent to the existing roadway and the existing roadway and embankment will be removed once the bridge section is open to public traffic.

Agency Action

The NPS Preferred Alternative, Alternative 6e, is identified in the Final EIS. FHWA will prepare its own Record of Decision for the Selected Alternative in accordance with 40 CFR 1505.2.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this proposed action.)
