On January 15, 2021, the Department of Justice and the State of California on behalf of the California Department of Toxic Substances Control (“DTSC”) lodged a proposed Consent Decree with the United States District Court for the Central District of California pertaining to environmental contamination at the Dense Non-Aqueous Phase Liquid Operable Unit (“DNAPL OU”) of the Montrose Chemical Corp. This proposed Consent Decree was lodged in the case *United States of America and State of California vs. Montrose Chemical Corp. of California et al.*, Civil Action No. 2:90–cv–03122 DOC (C.D. The proposed Consent Decree, titled in full “Partial Consent Decree (Montrose Superfund Site—Dense Non-Aqueous Phase Liquid (DNAPL)

Operable Unit)”, resolves certain claims or potential claims under Sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9606, 9607, as well as certain potential state law claims, in connection with environmental contamination at the DNAPL OU. The settling defendants are TFCF America, Inc.; Bayer CropScience Inc.; Montrose Chemical Corporation of California; and Stauffer Management Company LLC. The Consent Decree requires the settling defendants to perform the remedy at the DNAPL OU, which consists primarily of in-situ thermal treatment (electrical resistance heating) and soil vapor extraction with an associated land use covenant, and to make a payment of \$340,000.00 toward the United States’ unreimbursed DNAPL OU past costs and a payment of \$61,798.11 towards DTSC’s DNAPL OU past costs. The proposed Consent Decree also requires the settling defendants to pay the United States’ and DTSC’s future response costs for overseeing the work the settling defendants will be performing at the DNAPL OU.
