#### SUPPLEMENTARY INFORMATION:

*Description:* State child support agencies are required to establish and operate a federally approved statewide Automated Data Processing (ADP) and information retrieval system to assist in child support services. The APD process, established at 45 CFR part 95, subpart F, is the procedure by which states request and obtain approval for Federal Financial Participation (FFP) in their cost of acquiring ADP equipment and services. The ACF OCSS Division of State and Tribal Systems (DSTS) oversees this process.

States are required to submit an initial APD, containing information to assist the Secretary of the Department of Health and Human Services (HHS) in determining if the state computerized support enforcement project planning and implementation meets Federal certification requirements needed for the approval of FFP. States are then required to submit annual APD updates to HHS to report project status and request ongoing FFP for systems development, enhancements, operations, and maintenance. As-needed APDs are also submitted to acquire FFP when major milestones are missed or significant changes to project schedules occur. Based on an assessment of the information provided in the APD, states that do not meet the Federal requirements necessary for approval are required to conduct periodic independent verification and validation services for high-risk project oversight.

In addition to the APDs providing HHS/ACF/OCSS with the information necessary to determine the allowable level of Federal funding for state systems projects, states also submit associated procurement and data security documents, such as requests for proposals (RFPs), contracts, contract amendments, and the biennial security review reports.

*Respondents:* State child support agencies.
