

(FECA), 5 U.S.C. 8101 *et seq.*, the Black Lung Benefits Act (BLBA), 30 U.S.C. 901 *et seq.*, and the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA), 42 U.S.C. 7384 *et seq.* All three of these statutes require that OWCP pay for covered medical treatment provided to beneficiaries; this medical treatment can include medicinal drugs dispensed by pharmacies. In order to determine whether amounts billed for drugs are appropriate, OWCP must receive the required data elements, including the name of the patient/beneficiary, the National Drug Code (NDC) number of the drugs prescribed, the quantity provided, the prescription number and the date the prescription was filled. The regulations implementing these statutes require the collection of information needed to enable OWCP to determine if bills for drugs submitted directly by pharmacies, or reimbursement requests submitted by claimants, should be paid. There is no standardized paper form for submission of the billing information collected in this Information Collection Request (ICR). Over the past several years, almost all pharmacy bills submitted to OWCP have been submitted electronically using one of the industry-wide standard formats for the electronic transmission of billing data through nationwide data clearinghouses devised by the National Council for Prescription Drug Programs (NCPDP). None of the electronic billing formats have been designed by or provided by OWCP; they are billing formats commonly accepted by other Federal programs and in the private health insurance industry for drugs. Nonetheless, the three programs (FECA, BLBA and EEOICPA) provide instructions for the submission of necessary pharmacy bill data elements in provider manuals distributed or made available to all pharmacies enrolled in the programs.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive

consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention 1240–0050.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Title: Proof of Concept Application (POC) for New Charter Organizing Groups.

Type of Review: Extension of a currently approved collection.

Abstract: The Office of Credit Union Resources and Expansion (CURE) is responsible for the review and approval of charter applications submitted by organizing groups. CURE has implemented a charter modernization process to improve the quality of charter applications received. This will help ensure organizing groups submit a well-thought out, well-developed charter plan to minimize the back-and-forth communication and improve overall chartering processing times. CURE management implemented the Proof of Concept (POC) data collection through the CyberGrants system, which documents the four most critical elements for establishing a new charter. This is “Phase 1” of the process. The CyberGrants system is accessed online.

The four areas are usually the greatest challenge for organizers to accomplish.

When the organizers successfully address the four critical elements, organizing groups are invited to proceed to “Phase 2”, submission of most remaining charter documents and plans.

The “Phase 1” data is reviewed by NCUA to determine the adequacy of a group’s chartering concept and to provide guidance as needed. The purpose of this information collection is to identify the level of understanding an organizing group has before they make a formal charter application submission as prescribed by Appendix B to 12 CFR part 701 (12 U.S.C. 1758, 1759).

Affected Public: Private Sector: Not-for-profit institutions.

Estimated No. of Respondents: 26.

Estimated No. of Responses per Respondent: 1.

Estimated Burden Hours per Response: 4.

Estimated Total Annual Burden Hours: 104.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. The public is invited to submit comments concerning: (a) Whether the collection of information is necessary for the proper execution of the function of the agency, including whether the information will have practical utility; (b) the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of the information on the respondents, including the use of automated collection techniques or other forms of information technology.
