General Issues

A. Is the proposed collection of information necessary for the proper performance of the functions of the agency and does the information have practical utility? Practical utility is defined as the actual usefulness of information to or for an agency, taking into account its accuracy, adequacy, reliability, timeliness, and the agency's ability to process the information it collects.

B. What enhancements can be made to the quality, utility, and clarity of the information to be collected?

As a Potential Respondent to the Request for Information

A. Are the instructions and definitions clear and sufficient? If not, which instructions need clarification?

B. Can the information be submitted by the due date?

C. Public reporting burden for each collection is estimated and shown below as an average hour(s) per response. The estimated burden includes the total time necessary to provide the requested information. In your opinion, how accurate are these new estimates?

- Form EIA-411, "Bulk Power Supply Program Report,"—16.15 hours per response (previous estimate was 20.00 hours);
- Form EIA-412 "Annual Electric Industry Financial Report Utilities,"—32.30 hours per response (previous estimate was 30.30 hours);
- Form EIA-423, "Cost and Quality of Fuels for Electric Plants,"—2.00 hours per response (new form);
- Form EIA-826, "Monthly Electric Sales and Revenue Report with State Distributions,"—1.50 hours per response (previous estimate was 1.40 hours);
- Form EIA-860, "Annual Electric Generator Report,"—16.12 hours per response (previous estimate was 15.00 hours for Form EIA-860A and 2.12 hours for Form EIA-860B);
- Form EIA-861, "Annual Electric Power Industry Report,"—7.30 hours per response (previous estimate was 7.50 hours); and
- Form EIA-906, "Power Plant Report,"—1.40 hours per response (previous estimate was 1.40 hours for EIA-759 and 0.50 hours for Form EIA-900).

D. The agency estimates that the only cost to a respondent is for the time it will take to complete the collection. Will a respondent incur any start-up costs for reporting, or any recurring

annual costs for operation, maintenance, and purchase of services associated with the information collection?

E. What additional actions could be taken to minimize the burden of this collection of information? Such actions may involve the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

F. Does any other Federal, State, or local agency collect similar information? If so, specify the agency, the data element(s), and the methods of collection.

As a Potential User of the Information To Be Collected

A. Is the information useful at the levels of detail to be collected?

B. For what purpose(s) would the information be used? Be specific.

C. Are there alternate sources for the information and are they useful? If so, what are their weaknesses and/or strengths?

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. They also will become a matter of public record.
