Title: NSPS for Ammonium Sulfate Manufacturing Plants (Renewal).

ICR Numbers: EPA ICR Number 1066.07, OMB Control Number 2060–0032.

ICR Status: This ICR is scheduled to expire on April 30, 2013. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart PP.

Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 71 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operator of ammonium sulfate manufacturing plants.

Estimated Number of Respondents: 2.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 284.

Estimated Total Annual Cost: \$27,449, which includes \$27,449 in labor costs, and neither capital/startup costs, nor operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase in burden hours for both the respondents and the Agency due to a correction in the calculation methodology. The previous ICR assumed the hours per occurrence for each burden activity included technical, managerial, and clerical hours. This ICR assumes these hours per occurrence are for technical hours only, and calculates additional managerial and clerical hours as 5 and 10 percent of technical hours. There is also an increase in the respondent burden costs due to a change in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate respondent burden costs.

Additionally, there is a decrease in burden costs for the Agency from the most recently approved ICR due to a correction in labor rates. The previous ICR incorrectly used civilian rates to calculate Agency burden. This ICR uses rates from OPM, which results in an overall reduction in the Agency cost estimates.
