47 CFR Parts 73 and 76

[MB Docket No. 16-161; FCC 17-3]

Revisions to Public Inspection File Requirements—Broadcaster Correspondence File and Cable Principal Headend Location

AGENCY: Federal Communications
Commission.

ACTION: Final rule; announcement of
effective date.

SUMMARY: In this document, the Commission announces that the Office of Management and Budget (OMB) has approved, for a period of three years, some of the information collections associated with the Commission's decision, in *Report and Order*, Revisions to Public Inspection File Requirements—Broadcaster Correspondence File and Cable Principal Headend Location. Specifically, OMB has approved the Commission's decision to eliminate two public inspection file requirements: the requirement that commercial broadcast stations retain in their public inspection file copies of letters and emails from the public; and the requirement that cable operators maintain for public inspection the designation and location of the cable system's principal headend. This document is consistent with the *Report and Order*, which stated that the Commission would publish a document in the **Federal Register** announcing OMB approval and the effective date of these rule changes.

DATES: The amendments to 47 CFR 73.3526; 76.5(pp)(2); 76.1700; and 76.1708, published at 82 FR 11406 on February 23, 2017 are effective June 29, 2017.

Commission's *Report and Order*, FCC 17-3, published at 82 FR 11406, February 23, 2017. The OMB Control Numbers are 3060-0214, 3060-0316, and 3060-0649. As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received OMB approval, on March 24, 2017 and May 25, 2017, for the new information collection requirements contained in the Commission's rules at 47 CFR 73.3526; 76.5(pp)(2); 76.1700; and 76.1708. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Numbers are 3060-0214, 3060-0316, and 3060-0649.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104-13, October 1, 1995, and 44 U.S.C. 3507.

Needs and Uses: On January 31, 2017, the Commission adopted a Report and Order ("*Public Inspection File R&O*") in MB Docket No. 16-161, FCC 17-3, eliminating the requirement in §§ 73.1202 and 73.3526(e)(9) of its rules that commercial broadcast stations retain in their public inspection file copies of letters and emails from the public. The Commission concluded that this component of its public inspection file rules involves documents that do not need to be made available to the general public and that eliminating this requirement would reduce the burden of maintaining the public inspection file on commercial broadcasters. The Commission's goal is also to permit commercial television and radio broadcasters to cease maintaining a local public inspection file if they post all public file material to the online public file database and provide online access via their own Web site to back-up political file material. The Commission has previously adopted this option for other entities subject to our online public inspection file requirements. Because the correspondence file cannot be made available online for privacy reasons, removing this requirement would permit commercial broadcasters to elect to make their entire public inspection file available online and cease maintaining a local public file, thereby further reducing overall regulatory burdens on these entities.

Needs and Uses: On January 31, 2017, the Commission adopted a Report and Order ("Public Inspection File R&O") in MB Docket No. 16–161, FCC 17–3,

eliminating the requirement in §§ 76.5(pp) and 76.1700(a)(6) of its rules that cable systems retain the location and designation of the principal headend in their public file. This action reduces public inspection file requirements for these entities. However, because principal headend location information must be accessible to the Commission, broadcast television stations, and franchisors, cable systems will be required to provide principal headend location information to these entities upon request. In lieu of responding to individual requests for such information, operators may alternatively elect voluntarily to provide this information to the Commission for inclusion in the Commission's online public inspection file ("OPIF") database and may elect to make the information publicly available there.

If an operator changed the designation of its principal headend, that new designation was also required to be included in its public file.
