

Specifically, where the mutually exclusive group consists of proposals to serve different communities of license, each applicant within the group must submit an amendment containing supplemental information such as the following: (1) the area and population within the proposed 2 mV/m and 0.5 mV/m contours; (2) the number of stations licensed to the proposed community of license; (3) the number of stations providing service to the proposed community of license; (4) the population (according to the latest Census data) of the proposed community of license; (5) a description of the civic, cultural, religious, social or commercial attributes of the proposed community of license; and (6) any other information that the applicant determines relevant. The Commission will dismiss, without further processing, the previously filed AM auction filing window application and technical proposal of any applicant that fails to file an amendment addressing the section 307(b) criteria, where required.

In the licensing process for new AM stations, applicants' proposals are subject to a threshold determination under section 307(b) and may, in certain cases, qualify for a dispositive preference relative to the other mutually exclusive station proposals in the group. In such cases, the applicant proposing the community receiving the dispositive section 307(b) preference continues to the next stage of the licensing process, and thus may receive an authorization by virtue of the section 307(b) determination, rather than through competitive bidding.

In addition, certain mutually exclusive application groups containing major modification applications are permitted to resolve their mutual exclusivities through settlement agreements. These agreements must comply with 47 CFR 73.3525, Agreements for Removing Application Conflicts (approved under OMB 3060-0213). To facilitate processing, eligible applicants who intend to settle should promptly notify the Commission in writing that a pre-auction settlement is forthcoming.

Federal Communications Commission.

Marlene Dortch,

Secretary.

SUPPLEMENTARY INFORMATION: This previously approved information collection project was last published in the **Federal Register** (89 FR 105617) on December 27, 2024, and allowed 60 days for public comment. No public comment was received in response to the notice. This notice announces our intent to submit this collection, which expires February 28, 2025, to OMB for approval of an extension and solicit comments on specific aspects for the proposed information collection.

The IHS is submitting the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995, as amended, and its implementing regulations. This notice is soliciting comments from members of the public and affected agencies as required by 44 U.S.C. 3506(c)(2)(A) and 5 CFR 1320.8(d) concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques of other forms of information technology, e.g., permitting electronic submission of responses.
