Preparedness Research: Instruments

Abstract: The economic and human
toll of major disasters in the United
States is increasing and historically
underserved communities are
disproportionately impacted. Poverty,
race, limited English proficiency, age,
and other demographic, cultural, and
socio-economic variables can
significantly inhibit people’s ability to
take steps to prepare. To reverse this
trend, emergency managers must ensure
historically underserved communities
receive critical information that helps
each person take steps to prepare
themselves, their families, and their
communities. To achieve equity in
opportunities to prepare for disasters,
FEMA proposes a series of qualitative
focus groups, cognitive interviews, and
targeted surveys to better understand
individual experiences within
historically underserved communities
during recent disasters. FEMA Form
519–0–54 is a combined instrument that
contains the script and question bank
for conducting the focus groups,
cognitive interviews, and surveys.
