This is a request of a new collection. Public comments were previously requested via the **Federal Register** on April 16, 2019 during a 60-day comment period. This notice allows

for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. DATES: Additional comments may be submitted on or before September 27, 2019.

Abstract: Guidance documents were developed in 1986 for persons applying to EPA for approval to dispose of PCBs using incineration (40 CFR 761.70) or a method alternative to incineration (40 CFR 761.60(e)). The guidances are split into two document (thermal and non-thermal) and they present and discuss the format, content, and suggested level of detail for approval applications, test plans, and test reports.

EPA is currently updating these guidance documents and will combine

into a single document. This is a new ICR that addresses reporting and recordkeeping requirements found in the updated guidance document identified above. The previous guidance documents released in 1986 were not required to conduct an ICR so a new ICR will be created for the updated guidance. While use of the updated guidance document is voluntary, the PRA still requires the reporting and recordkeeping of this guidance to be determined. This includes reading and using the tables provided in the guidance.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this ICR include respondents applying to the EPA for approval to treat/dispose PCBs using incinerator or an alternative method. This likely includes entities within the Waste Management and Remediation Services (NAICS 562) and Professional, Scientific, and Technical Services (NAICS 54) sectors and includes private entities.

Respondent's obligation to respond: Voluntary, for use in applying to EPA for approval under 40 CFR parts 761.60(e) or 761.70.

Estimated number of respondents: 8.

Frequency of response: One-time.

Total estimated burden: 320 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$25,065 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: This ICR describes the guidance and estimates the annual hour and cost burden to respondents and EPA who choose to use the new Guidance for Applicants Requesting to Treat/Dispose of PCBs Using Incineration or an Alternative Method. This guidance combines two existing guidance documents that were developed in 1986 for persons applying to EPA for approval to dispose of PCBs using incineration (761.70) or a method alternative to incineration (761.60(e)) and present and discuss the format, content, and suggested level of detail for approval applications, test plans, and test reports.

Director, Regulatory Support Division.
