

After reviewing SPE's request that the Department apply its alternative arrangements to its proposed mining plan modification, the ASLM approved the alternative arrangement for NEPA compliance for this energy-related project on May 12, 2025. In reaching this determination, the ASLM relied on SPE's request for alternative arrangement, E.O. 14156, E.O. 14154 ("Unleashing American Energy"), E.O. 14261 ("Reinvigorating America's Beautiful Clean Coal Industry"), Secretary's Order (S.O.) 3417, S.O. 3418, various documents related to the ongoing NEPA analysis for this proposed mining plan modification, and consultations with OSMRE. Importantly, the ASLM concluded that this proposed project seeks to advance energy production and would export nearly all its coal to Japan and South Korea, important defense allies of the United States. Finally, the ASLM also determined that additional public comment was unnecessary due to the prior robust opportunities for public participation and the fact that another 10-day comment period on another NOI was unlikely to yield substantive comments.

OSMRE Recommendation

Informed by, at a minimum, the material required at 30 CFR 746.13, including information prepared in compliance with NEPA, OSMRE must make a recommendation to the ASLM about the proposed Federal mining plan modification associated with AM 3. The ASLM will use OSMRE's recommendation to decide whether a new mining plan modification is approved, disapproved, or approved with conditions.

As documented in the ROD, OSMRE is recommending that the ASLM approve the proposed mining plan modification, including the entire area covered by AM 3, as discussed in the EIS.
