Energy Conservation Program: Energy Conservation Standards for Commercial Water Heating Equipment; Reopening of Comment Period

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of proposed rulemaking; reopening of public comment period.

SUMMARY: On May 19, 2022, the U.S. Department of Energy (DOE or the Department) published in the **Federal Register** a notice of proposed rulemaking and announcement of public meeting regarding energy conservation standards for commercial water heaters. DOE received three requests to extend the public comment period by 60 days. DOE has reviewed and denied these requests. But, considering the particular circumstances of DOE's denial of these petitions, the Department is reopening the public comment period to allow comments to be submitted until August 1, 2022.

DATES: The comment period for the notice of proposed rulemaking published in the **Federal Register** on May 19, 2022 (87 FR 30610) is reopened until August 1, 2022. Written comments, data, and information are requested and will be accepted on and before August 1, 2022.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at www.regulations.gov. Follow the instructions for submitting comments. SUPPLEMENTARY INFORMATION: On May 19, 2022, DOE published in the **Federal Register** a notice of proposed rulemaking (“NOPR”) and announcement of public meeting regarding energy conservation standards for commercial water heaters. DOE stated it would accept written comments, data, and information on the proposal by July 18, 2022. 87 FR 30610.

On June 17, 2022, DOE received a joint comment from the American Public Gas Association (“APGA”), American Gas Association (“AGA”), Plumbing-Heating-Cooling Contractors—National Association

(“PHCC”), Air-Conditioning, Heating, & Refrigeration Institute (“AHRI”), Spire Inc., Spire Missouri Inc., and Spire Alabama Inc. (collectively, the “Joint Commenters”), requesting a 60-day extension of the public comment period to allow more time to review the NOPR, the preliminary Technical Support Document (“TSD”), and the supportive material.¹ On July 8, 2022, DOE also received a comment from Atmos Energy requesting a 60-day extension to allow for the collection and analysis of data from their service territories.² Finally on July 11, 2022, DOE also received a comment from Bradford White Corporation requesting a 60-day extension of the public comment period as DOE has produced a substantial number of rulemakings in the past few months, and additional time is needed to meaningfully respond to these actions.³

In response, DOE notes its continued belief that a 60-day comment period is sufficient for most proposed rules.⁴ Generally, DOE will consider extending comment periods for good cause when the proposed rule is unusually complex or presents novel issues.⁵ Absent a showing of good cause, DOE will adhere to its default 60-day comment period. As DOE has explained, it is the Department’s view that 60-days comment periods adequately balance the need for efficient rulemaking to meet statutory rulemaking deadlines with the public’s interest in meaningfully participating in those rulemakings. In this case, DOE has reviewed these requests and determined that none of the petitioners have shown good cause to extend the 60-day comment period. However, given the timing of this notice, DOE is nevertheless reopening the comment period until August 1, 2022.
