

describe the uncertainty associated with sampling and testing used to obtain the manifest concentrations.

WCS shall review the above information and, if adequate, approve in writing this pre-shipment waste characterization and assurance plan before permitting the shipment of a waste stream. This will include statements that WCS has a written copy of all the information required above, that the characterization information is adequate and consistent with the waste description, and that the information is sufficient to demonstrate compliance with Conditions 1 through 4. Where generator process knowledge is used to demonstrate compliance with Conditions 1, 2, 3, or 4, WCS shall review this information and determine when testing is required to provide additional information in assuring compliance with the Conditions. WCS shall retain this information as required by the State of Texas to permit independent review.

At the time waste is received, WCS shall require generators of SNM waste to provide a written certification with each waste manifest that states that the SNM concentrations reported on the manifest do not exceed the limits in Condition 1, that the measurement uncertainty does not exceed the uncertainty value in Condition 1, and that the waste meets Conditions 2 through 4.

WCS shall require generators to sample and determine the SNM concentration for each waste stream at the following frequency: (a) If the concentrations are above one tenth the SNM limits (Condition 1), once per 600 kg, (b) if the concentrations are below one tenth and greater than one hundredth of the SNM limits, once per 6,000 kg, and (c) if the concentrations are below one hundredth of the SNM limits, once per 60,000 kg.

If the waste is determined to be not homogeneous (i.e., maximum, which cannot exceed the limits in Condition 1, and minimum testing values performed by the generator are greater than five times the average value), the generator shall sample and determine the SNM concentration once per 600 kg thereafter, regardless of SNM concentration. In this case, samples shall be a composite consisting of four uniformly sampled aliquots.

The certifications required under these conditions shall be made in writing and include the statement that the signer of the certification understands that this information is required to meet the requirements of the U.S. Nuclear Regulatory Commission and must be complete and accurate in all material respects.

7. WCS shall sample and determine the SNM concentration for each waste stream at the following frequency: (a) If the concentrations are above one tenth the SNM limits (Condition 1), once per 1,500 kg for the first shipment and every 6,000 kg thereafter, (b) if the concentrations are below one tenth and greater than one hundredth of the SNM limits, once per 20,000 kg for the first shipment and every 60,000 kg thereafter, and (c) if the concentrations are below one hundredth of the SNM limits, once per 600,000 kg. This confirmatory testing is not required for waste to be disposed of at DOE's WIPP facility.

If the waste is determined to be not homogeneous (i.e., maximum and minimum testing values performed by the generator are greater than five times the average value), WCS shall sample and determine the SNM concentration once per 1,500 kg for the first shipment and every 6,000 kg thereafter, regardless of SNM concentration. In this case, samples shall be a composite consisting of four uniformly sampled aliquots.

8. WCS shall notify the NRC, Region IV office within 24 hours if any of the above Conditions are violated. A written notification of the event must be provided within 7 days.

9. WCS shall obtain NRC approval prior to changing any activities associated with the above Conditions.

The licensing requirements in 10 CFR part 70 apply to persons possessing greater than critical mass quantities (as defined in 10 CFR 150.11). The principal emphasis of part 70 is criticality safety and safeguarding SNM against diversion or sabotage. Staff considers that criticality safety can be maintained by relying on concentration limits, under the conditions specified above. Safeguarding SNM against diversion or sabotage is not considered a significant issue because of the diffuse form of the SNM in waste meeting the above conditions. These concentration limits are considered an alternative definition of quantities not sufficient to form a critical mass to the weight limits in 10 CFR 150.11, thereby assuring the same level of protection.

The Commission concludes that this proposed exemption will have no significant radiological or nonradiological environmental impacts. Accordingly, the Commission has determined, pursuant to 10 CFR 70.14, that the exemption of above activities at the WCS facility is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest. Accordingly, by this Order, the Commission hereby grants this

exemption subject to the above conditions. The exemption will become effective after the State of Texas has incorporated the above conditions into WCS's RML.

Pursuant to the requirements in 10 CFR part 51, the Commission has published an EA for the proposed action wherein it has determined that the granting of this exemption will have no significant impacts on the quality of the human environment. Copies of the EA and SER are available for public inspection at the Commission's Public Document Room, located at One White Flint North, Room 0-1F21, 11555 Rockville Pike, Rockville, MD 20852.

Dated at Rockville, Maryland, this 30th day of October 2001.

For the Nuclear Regulatory Commission.

Martin J. Virgilio,

Director, Office of Nuclear Material Safety and Safeguards.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards

Subcommittee Meeting on Thermal-Hydraulic Phenomena; Notice of Meeting

The ACRS Subcommittee on Thermal-Hydraulic Phenomena will hold a meeting on November 28, 2001, Room T-2B1, 11545 Rockville Pike, Rockville, Maryland.

Portions of the meeting may be closed to public attendance to discuss Electric Power Research Institute proprietary information per 5 U.S.C. 552b(c)(4).

The agenda for the subject meeting shall be as follows:

Wednesday, November 28, 2001—8:30 a.m. until the conclusion of business.

The Subcommittee will: (1) Continue review of the NRC Office of Nuclear Regulatory Research activities pertaining to thermal-hydraulic phenomena in support of the ACRS annual report to the Commission on the NRC Safety Research Program, and (2) discuss a proposal by the licensees of the Point Beach and Beaver Valley plants to perform more-realistic analysis for containment design-basis accidents using the MAAP code. The purpose of this meeting is to gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the

concurrence of the Subcommittee Chairman. Written statements will be accepted and made available to the Committee. Electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the cognizant ACRS staff engineer named below five days prior to the meeting, if possible, so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, Fauske and Associates, Inc., and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been canceled or rescheduled, and the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor, can be obtained by contacting the cognizant ACRS staff engineer, Mr. Paul A. Boehnert (telephone 301-415-8065) between 7:30 a.m. and 5 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two working days prior to the meeting to be advised of any potential changes to the agenda, etc., that may have occurred.

Dated: November 8, 2001.

Sher Bahadur,

Associate Director for Technical Support.

PENSION BENEFIT GUARANTY CORPORATION

Required Interest Rate Assumption for Determining Variable-Rate Premium; Interest Assumptions for Multiemployer Plan Valuations Following Mass Withdrawal

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of interest rates and assumptions.

SUMMARY: This notice informs the public of the interest rates and assumptions to be used under certain Pension Benefit

Guaranty Corporation regulations. These rates and assumptions are published elsewhere (or are derivable from rates published elsewhere), but are collected and published in this notice for the convenience of the public. Interest rates are also published on the PBGC's web site (<http://www.pbgc.gov>).

DATES: The required interest rate for determining the variable-rate premium under part 4006 applies to premium payment years beginning in November 2001. The interest assumptions for performing multiemployer plan valuations following mass withdrawal under part 4281 apply to valuation dates occurring in December 2001.

FOR FURTHER INFORMATION CONTACT:

Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005, 202-326-4024. (TTY/TDD users may call the Federal relay service toll-free at 1-800-877-8339 and ask to be connected to 202-326-4024.)

SUPPLEMENTARY INFORMATION:

Variable-Rate Premiums

Section 4006(a)(3)(E)(iii)(II) of the Employee Retirement Income Security Act of 1974 (ERISA) and § 4006.4(b)(1) of the PBGC's regulation on Premium Rates (29 CFR part 4006) prescribe use of an assumed interest rate (the "required interest rate") in determining a single-employer plan's variable-rate premium. The required interest rate is the "applicable percentage" (currently 85 percent) of the annual yield on 30-year Treasury securities for the month preceding the beginning of the plan year for which premiums are being paid (the "premium payment year"). The yield figure is reported in Federal Reserve Statistical Releases G.13 and H.15.

The required interest rate to be used in determining variable-rate premiums for premium payment years beginning in November 2001 is 4.52 percent (i.e., 85 percent of the 5.32 percent yield figure for October 2001).

The following table lists the required interest rates to be used in determining variable-rate premiums for premium payment years beginning between December 2000 and November 2001.

For premium payment years beginning in	The required interest rate is
December 2000	4.91
January 2001	4.67
February 2001	4.71
March 2001	4.63
April 2001	4.54
May 2001	4.80
June 2001	4.91
July 2001	4.82

For premium payment years beginning in	The required interest rate is
August 2001	4.77
September 2001	4.66
October 2001	4.66
November 2001	4.52

Multiemployer Plan Valuations Following Mass Withdrawal

The PBGC's regulation on Duties of Plan Sponsor Following Mass Withdrawal (29 CFR part 4281) prescribes the use of interest assumptions under the PBGC's regulation on Allocation of Assets in Single-employer Plans (29 CFR part 4044). The interest assumptions applicable to valuation dates in December 2001 under part 4044 are contained in an amendment to part 4044 published elsewhere in today's **Federal Register**. Tables showing the assumptions applicable to prior periods are codified in appendix B to 29 CFR part 4044.

Issued in Washington, DC, on this 7th day of November 2001.

John Seal,

Acting Executive Director, Pension Benefit Guaranty Corporation.

POSTAL SERVICE

Plan for Secure Postage Meter Technology

AGENCY: Postal Service.

ACTION: Notice of final plan.

SUMMARY: The Postal Service has already completed the first phase of a plan to remove insecure postage meters from use with the decertification of mechanical postage meters. The second phase of the plan, the retirement of manually reset electronic meters, is now underway in accordance with the notice published in the **Federal Register** on December 13, 2000 (Volume 65, Number 240, page 77934-77938). This notice publishes the final plan for phases III and IV of the Postal Service's Plan for Secure Postage Meter Technology. There may be additional phases of the plan beyond phase IV. Upon completion of all phases of the plan, meters in service will offer enhanced levels of security, thereby greatly reducing the Postal Service's exposure to meter fraud, misuse, and loss of revenue. These new meters also provide advanced customer features and convenience.

DATES: This plan is effective November 15, 2001.
