

include the effective date of any changes to a customer's local service account and the carrier identifications code of the customer's IXC among the categories of information that must be provided to the IXC by the LEC. The Commission concludes that knowing the effective date of account changes will help IXCs to maintain accurate customer account information and that including the carrier identification code of the customer's IXC will enable an IXC to verify that it is the proper recipient of the transmitted information.

Paragraph 64.402(g) of the Commission's rules is modified to make the information categories included in paragraph 64.402(g) consistent with those included in other LEC notifications requirements. Paragraph 64.4002(g) also is modified to require that when a customer changes LECs, but wishes to retain his current PIC, the new LEC must so notify the current PIC so that the current PIC does not erroneously assume, absent additional

notification from the new LEC, that the customer also wishes to cancel his current PIC.

FCC Alerts Public and Merchants of Fraudulent Credit Card Purchases Through Internet Protocol (IP) Relay Service, a Form of Telecommunications Relay Services (TRS)

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Commission urges merchants to use caution in handling telephone orders for goods. The Commission has received informal complaints that people without disabilities, who are posing as deaf or hard of hearing consumers, are misusing an Internet base telecommunications relay service ("TRS" or "Relay Service")

called "IP Relay" to perpetrate fraudulent business transactions, often by using stolen or fake credit cards.

Synopsis

The Commission urges merchants to use caution in handling telephone orders for goods. Merchants that accept orders made by telephone for goods and services should take steps to ensure that, for any order placed by phone, the payment method or credit card is valid and the purchaser is authorized to use the particular credit card. In addition, there are some indicia of fraudulent telephone orders or business transactions that merchants can use to help determine if an order placed by phone is legitimate. These indicia include a caller who: (1) Is happy to order "whatever you have in stock"; (2) supplies multiple credit cards as one or more are declined; (3) cannot provide the credit card verification code number
