

the January 2006 ROD and enjoined the Secretary from further action in the Northeast NPR-A under that ROD. The primary deficiency identified by the court concerned the failure to adequately address certain cumulative impacts associated with development in the adjacent Northwest NPR-A. The supplemental IAP/EIS will provide additional analysis necessary to fully address the deficiencies noted by the court and update relevant sections of the document with any new information. Any final decision will consider the full range of alternatives contained in the January 2005 Amended IAP/EIS, as informed by this new analysis.

While scoping is not required for supplements to environmental impact statements (40 CFR 1502.9(c)(4)), BLM is inviting comments on the supplement. Commenters are especially encouraged to identify measures that could reduce impacts to resources or uses that could be impacted by oil and gas and other activities in both the Northeast and Northwest NPR-A planning areas. The agency seeks specific, rather than general, recommendations as to stipulations, operating procedures, and other mitigating measures that the BLM could consider to further its goal of reducing impacts.
