Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the

Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639-7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project

State Surveys on Intimate Partner Violence (IPV) and Sexual Violence (SV)—NEW—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention. Violence against women has become a major public health issue in the nation. It is the leading cause of injury for women between the ages of 18 and 44. The National Violence Against Women Survey, conducted from November 1995 to May 1996, estimates that approximately 1.9 million women are physically assaulted annually in this country by an intimate partner (e.g., current or former husband, cohabiting partner, boyfriend or date). The 1994 National Crime Victimization Survey estimates that over 432,000 rapes or sexual assaults were perpetrated against U.S. females, age 12 years and older.

The National Center for Injury Prevention and Control has recognized intimate partner violence (IPV) and sexual violence (SV) as public health problems for several years. Survey data are the most common data used to determine incidence and prevalence rates, risk and resiliency factors, and consequences (e.g., physical injuries, psychological trauma) of IPV and SV. The Department of Justice has compiled a number of one-time looks at VAW from a variety of perspectives, primarily provided by the criminal justice system,
