Outer Continental Shelf Official Protraction Diagrams and Supplemental Official Outer Continental Shelf Block Diagrams

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Availability of revised North American Datum of 1927 (NAD 27) Outer Continental Shelf Official Protraction Diagrams and Two Lease Maps Diagrams.

SUMMARY: Notice is hereby given that effective with this publication, certain NAD 27-based Outer Continental Shelf (OCS) Official Protraction Diagrams (OPDs) and two Lease Maps depicting geographic areas located in the Gulf of Mexico with revision dates as indicated are now available. BOEM, in accordance with its authority and responsibility under the OCS Lands Act, is updating the maps used for the description of renewable energy, mineral, and oil and gas lease sales in the geographic areas they represent.

BOEM produces and maintains the official marine cadastre for the OCS areas of the United States. The marine cadastre is a comprehensive spatial data infrastructure whereby rights, restrictions and responsibilities in the marine environment can be assessed,

administered and managed. The marine cadastre includes the block grids and official boundaries, which provide the base for nearly all of the BOEM offshore maps and leasing processes. It also gives BOEM the means to define, describe, analyze, and account for every acre/hectare of federal offshore submerged lands.

Pursuant to the "Agreement between the United Mexican States and the United States of America Concerning Transboundary Hydrocarbon Reservoirs in the Gulf of Mexico," which went into effect on July 18, 2014, certain activities carried out within three (3) statute miles of the U.S.-Mexico maritime boundary in the Gulf of Mexico trigger obligations for the United States related to such activities within its jurisdiction. The following OPDs and Lease Maps (dated October 1, 2014) have been revised to reflect this "Transboundary Three Statute Mile Line."
