**SUPPLEMENTARY INFORMATION:** The American Time Use Survey (ATUS) is the Nation's only federally administered, continuous survey on time use in the United States. It measures, for example, time spent with children, working, providing eldercare, sleeping or doing leisure activities. In the United States, several existing Federal surveys collect income and wage data for individuals and families, and analysts often use such measures of material prosperity as proxies for quality of life. Time-use data substantially augment these quality-of-life measures. The data also can be used in conjunction with wage data to evaluate the contribution of non-market work to national economies. This enables comparisons of production between nations that have different mixes of market and non-market activities. The ATUS supports the mission of the Bureau of Labor Statistics by providing data on when, where, and how much employed Americans work. Individuals aged 15 and up are selected from a nationally representative sample of households each month for the ATUS. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 28, 2025 (90 FRN 14168).

In addition, notwithstanding any other provisions of

#### SUPPLEMENTARY INFORMATION:

##### I. Notice of the Application for Expansion

OSHA is providing notice that Intertek Testing Services NA, Inc. (ITSNA), is applying for expansion of the current recognition as a NRTL. ITSNA requests the addition of one test standard to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR

1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes: (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including ITSNA, which details the NRTL's scope of recognition. These pages are available from the OSHA website at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

##### II. General Background on the Application

ITSNA submitted an application dated February 15, 2021 (OSHA–2007–0039–0063), requesting the addition of one test standard to the NRTL scope of recognition. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA performed an on-site review of ITSNA's Cortland, New York facility on April 14–16, 2024, where assessors found nonconformances with 29 CFR 1910.7. ITSNA addressed these issues sufficiently, and OSHA staff has preliminarily determined that OSHA should grant the expansion application to include this additional standard.

Table 1, below, lists the appropriate test standard in ITSNA's application for expansion for testing and certification of products under the NRTL Program.
