BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Institute Initial Review Group; Transition to Independence Study Section (I).

Date: October 18-19, 2023.

Time: 11:00 a.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W602, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: Delia Tang, M.D., Scientific Review Officer, Resources and Training Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W602, Rockville, Maryland 20850, 240-276-6456, tangd@mail.nih.gov.

Name of Committee: National Cancer Institute Special Emphasis Panel; NCI Program Project (P01) Review SEP-E.

Date: November 9, 2023.

Time: 10:00 a.m. to 1:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W126, Rockville, Maryland 20850 (Telephone Conference Call).

Contact Person: Mukesh Kumar, Ph.D., Scientific Review Officer, Research Program Review, Branch Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W126, Rockville, Maryland 20850, 240-276-6611, mukesh.kumar3@nih.gov.

(Catalogue of Federal Domestic Assistance Program Nos. 93.392, Cancer Construction; 93.393, Cancer Cause and Prevention Research; 93.394, Cancer Detection and Diagnosis Research; 93.395, Cancer Treatment Research; 93.396, Cancer Biology Research; 93.397, Cancer Centers Support; 93.398, Cancer Research Manpower; 93.399, Cancer Control, National Institutes of Health, HHS)

Dated: September 18, 2023.

Government-Owned Inventions; Availability for Licensing and Collaboration

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The invention described below presents an advancement concerning osteoclast fusion; osteoclasts are responsible for human skeletal remodeling and their dysfunction is a key factor for both rare and common bone diseases. The invention covers methods for modulating osteoclast fusion and bone resorption through the Lupus autoantigen (La) protein. The Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), National Institutes of Health, has conducted conceptual *in-vitro* studies and is now seeking potential licensees and

collaborators for further development and advancement.

ADDRESSES: Inquiries relating to this licensing and collaboration opportunity should be directed to: Heather Gunas, JD, MPH, Senior Technology Transfer Manager, National Cancer Institute (NCI) Technology Transfer Center, 9609 Medical Center Drive, Room 1E446, Rockville, MD 20850 (*for overnight mail*) or Bethesda, MD 20892 (*for regular mail*), Telephone: (240) 276-5530; Facsimile: (240) 276-5504; Email: gunash@mail.nih.gov. A Confidential Disclosure Agreement will be required to receive copies of unpublished information regarding this invention.

SUPPLEMENTARY INFORMATION: The following and all continuing U.S. and foreign patents/patent applications thereof are available for licensing: PCT Application No. PCT/US22/018639, filed March 3, 2022, and entitled “La protein as a novel regulator of osteoclastogenesis.” The Lupus autoantigen (La) protein is a master regulator of osteoclasts. The technology involves a novel mechanism for precise regulation of osteoclastogenesis through the manipulation of surface La protein. The ability of osteoclasts to remodel bone can be modulated by: (1) administering an effective amount of La protein or (2) administering an agent that modulates La protein expression or activity. Current solutions for bone diseases are usually broad-spectrum treatments that either coat the skeletal system or inhibit osteoclast development and these approaches can result in off-target side effects. This technology’s approach to regulating osteoclast fusion and osteoclastogenesis by targeting the La protein should bypass many side effects. The technology has been supported by conceptual *in-vitro* data and lead optimization is ongoing; further research and development are required to advance it towards disease-specific preclinical and clinical stages.

Potential Commercial Application: Treatment of common and rare bone diseases, including osteoporosis, Paget’s disease of bone, fibrous dysplasia, rheumatoid arthritis, osteopetrosis, osteomyelitis, or metastatic bone disease.

Development Stage: *In-vitro* study completed and lead optimization ongoing.

Dated: September 18, 2023.

Richard U. Rodriguez,

Associate Director, Technology Transfer Center, National Cancer Institute.
